an attempt was made to hide a smallpox victim and deceive health officials. The originating case occurred in a home at Point Lookout near Phillipsburg, where a young firl who had come from Ohio with the disease developing, was stricken unmistakebly. She was secreted and her case was not reported until contact with her spread the disease in Blue Ball, and the Health Department knew nothing of the situation which now threatens Blue Ball and the surrounding territory."

lion's share of the task will belong to the United States. This opinion, advanced by many competent observers since Russia's lapse into anarchy and Italy's staggering reverses, is accepted by our press in all parts of the land in a spirit of quiet and unfaltering resolution. "We have drawn the sword and we might as well throw away the scabbard," exclaims the Chicago Herald, "for it is to be a fight to a finish and German successes in Russia and Italy indicate that the struggle may be prolonged.

The only German drive that the Allies have reason really to fear, many of our papers declare, is the coming drive for peace terms that will leave Germany secure in the possession of her present absolute control over middle Europe, and which will doubtless find expression through various pacifist outlets in America. "What I am opposed to is not the feeling of the pacifists," says President Wilson, "but their stupidity. My heart is with them but my mind has a contempt for them. I want peace, but I know how to get it and they do not."

"Digest" Readers Acclaim Its Worth from All Quarters of the Globe

From the steaming jungles of Senegal, the fertile plains of the Argentine, the temple shades of Japan, the teak forests of Burma, the coco-palms of Hawaii, the blue-gum groves of Australia, and the far-flung acres of Saskatchewan, a single mail recently brought to the editors of THE LITERARY DIGEST a sheaf of letters telling of the writers' gratitude for the opportunity afforded by this most comprehensive of newsrecorders of keeping posted on all the great events of

the day. Other letters tell how it keeps the prospectors in a far-western mining-camp in touch with the world's affairs and how it is passed eagerly from hand to hand by the "Tommies" and "Sammies" in the trenches on the Somme. Wherever men gather together it is read from cover to cover for its crisp, condensed, and wholly impartial summaries of current happenings. It is cosmopolitan in its scope and universal in its sympathies. To read it is to become a citizen of the world.
