PENNSYLVANIA'S PART IN THE WAR

General Beary Tells D. A. R. What Keystone State Is Doing For Country's Service

Foremost be thou in the van for the liberty of man—Pennsylvania hall to thee," sang the Girls' Glee Club of the Central High school following an address brim full of information about "Pennsylvania's Part in the War," given by Adjutant General Frank D. Beary yesterday afternoon before Harrisburg Chapter Daughters of the American Revolution, in Assembly hall of the Y.

"Four years ago," said General Beary, "the United States Army numbered 55,000 men, but through the National Defense Act Congress authorized the President to increase this number to 96,000. It was against the law for a National Guardsman to serve outside of his own country, but by making them regulars this was overcome."

"Pennsylvania plays so important a part in the world war for democracy that should she be withdrawn, this country would be virtually unable to win the struggle. Over 1-10 of all the wealthy families, among them are the names of the nation's elite and men are being furnished by the Keystone state, the backbone of America. Nearly 29,000 of the best of her young manhood are drafted last fall in addition to the increased Regular Army."

General Beary considers the much used, much abused word "draft" a misnomer, a survival of the past wars when our nation was not so well qualified to face big issues. Rather should it be called the "selective system" which men in all walks of life are picked for service in the National Army.
