### **CALL SYSTEM FOR** WEST SHORE FIRES

Firemen's Union Completing Work of Listing Telephones For Emergency Calls

The work of special committees of the West Shore Firemen's Union during the month will be centered on completion of the telephone call system hanging fire for several months: transfer proposition and making cut reports of the sizes of hose of each company on the West Shore.

Before the next meeting it is expected that the telephone call system will be completed and presented to the union for its approval. It is planned to have several phones in each borough to be located near the irrehouse in that town listed in the telephone directory as fire phones. In case a fire is large enough to call out companies in all West Shore towns firemen will be able to get in touch with each other without delay.

members.
At the last meeting of the union, esident J. Fred Hummel requestthat delegates from each comny should get the sizes of the hose din their company and present en at the next session. A list of sizes will be posted and in case fire it will be possible to use the appment from all the towns.

Dandruffy Heads Become Hairless

If you want plenty of thick, beautial, glossy, silky hair, do by all means et rid of dandruff, for it will starve our hair and ruin it if you don't. It doesn't do much good to try to ush or as and the stroy it can be stroy it entirely. It doesn't do dandruff is to discarve it, then you destroy it entirely. It do this, get about four ounces of dinary liquid arvon; apply it at ght when retiring; use enough to oisten the scalp and rub it in gently it the finger tips. By morning, most if not all, of your ndruff will be gone, and three or ur more applications will completely solve and entirely destroy every igle sign and trace of it. You will find, too, that all itching it digging of the scalp will stop, and ur hair will look and feel a hundred nes betfer. You can get liquid arin at any drugstore. It is inexpenent at any drugstore, it is inexpenent in at any drugstore, it is inexpenent in the start of the s

WETT SHORE BOROUGH OFFICERS READY FOR DUTIES IN JANUARY

ary 1. This is the first case of the kind in any town on the West Shore. When residents of the borough asked Burgess Hummel to become a candidate for the office prior to the primary election this fall, re refused, but afterward said he would serve if the people elected him without having his name on the ticket.

Wormleysburg council will be composed of the number of members required by law after January 1. Through several resignations during the year the number of councilmen has dwindled to a small number. But one more than a quorum was in the

NORMAL SCHOOL VACATION
Pa. Dec. 13.—The Shippensburg, Pa., Dec. 13.—The fall term of the State Normal school will end December 20 at noon. The students will have almost two weeks vacation. They will return to school on Tuesday, January 1.

HIGH SCHOOL SERVICE FLAG
Mercersburg, Pa., Dec. 13.—The
Mercersburg High school will unfurl their service flag, which contains
twenty-one stars, representing the
High School Alumni at the front,
nextsFriday afternoon. At the same
time an honor roll beautifully framed, will be placed on the wall. Prominent speakers will be present.

#### Bread Is Seven Cents Per Pound in Phila

Philadelphia, Dec. 13.—Bread at 7 cents a loaf, the lowest price in the United States is the result of stabilization of the wheat situation in Philadelphia, officials of the food administration announced here yesterday. In virtually all the stores where dealing is being done on a cash-and-carry basis, the new war bread is being sold at just half a cent more than it costs the independent baker. Grocers and bakers are of the opinion that this price for bread will remain so long as wheat is at a stable price.

BAKERS OF LEWISTOWN
RAISE PRICE OF BREAD
Lewistown, Pa., Dec. 13.—Efforts
of the government to economize on
the ingredients entering into the
baking of the war loaf have been virtually nullified here by the action
of the bakers of Lewistown and vicinity who have advanced prices to
ten cents for a pound loaf and to
fifteen cents for the pound and a
half size.

plaster was forced off in the room below occupied by the commanding officer, Colonel Hatfield.

officer, Colonel Hatfield.

Cries of distress from that official caused a rapid clearing of the examining room and the two flights of stairs, which were filled with a crowd which extended into the street. On and on came applicants. There was desperate crowding to get at the head of the line but the hordes of young men trying to get "in under" before the drafted deadline is drawn, were good-natured and indulged in much raillery.

Records became confused so that

Recruiting Headquarters

Philadelphia, Dec. 13.—Nearly 1.—
400 men fought their way through the crowds before the Army, Navy and Marine recruiting offices in Arch street yesterday and applied for enlistment. So many packed into the Army examining room at one time that the floor started to give and plaster was forced off in the room

plaster was forced off in the room

it was hard for the feverishly working force to know positively where they stood. Four shipments of men were made during the day, two in the forenoon and two in the afternoon. It was estimated that the forments of men had been accepted by the Army out of more than 1,000 applicants, which made it the record recruiting day of this city. The marines captured twenty men and the Navy gathered in seventy, making the total bag of the day 540 men. On Tuesday a total of 382 men were recruited.

ANNOUNCE BIRTH OF DAUGHTER Enola, Pa., Dec. 13.—The Rev. and Mrs. M. S. Sharp, corner of Altoona avenue and Columbia road, announce

# That Film on Teeth

The Source of All Tooth Troubles

By William M. Ruthrauff, A. B., A. M.

All Statements Approved by High Dental Authorities

# and Decay

Why Germs Breed Around Them

What you already know is this: Despite all your brushing, your teeth still discolor. Tartar forms on them, so they need frequent dental cleaning. And some teeth still decay.

You know that what you do, and what you use, fail to really keep teeth clean. Your present methods don't protect you. So there must be something wrong.

The trouble lies in a slimy, ever-present film which you feel with your tongue.

That film is where the stains lodge, spoiling the teeth's whiteness. That film is what hardens into That film is what holds food particles. There they

shortly ferment and form acid—the cause of all tooth

And that film is where the germs breed—the germs which cause countless troubles, including pyorrhea.

Thus the chief object of teeth-cleaning is to keep rid of that film. And that is where your methods fail.

Feel your teeth with your tongue, however often you brush them, and you find that film still there. Every discolorment proves it—every evidence of tartar. But between the teeth and in crevices is where it accumulates most.

It is now known that alkali hardens it. So soapy applications do more harm than good.

And we can't combat the acids or destroy the germs while that film remains to protect them.

That is why your method of teeth-cleaning fails.

It removes only the loose debris. That is important, but water alone will do that. There is little need of a dentifrice unless it attacks that film. For, day and night, harmful things are being held by that film to the

That is your situation unless your dentist has already told you of Pepsodent. Your teeth are not clean, not safe. They do not long stay white. And you rely for your protection on periodic dental cleaning.

But now science has solved this film problem. And this is to ask that you prove it by a one-week's pleas-

## Why Teeth Discolor Now There's a Way to End It

To Keep Teeth Really Clean

Three years ago a way was found to keep the teeth free from this film. Those three years have been spent by dentists in proving the fact beyond question.

There have been many false theories of teeth-cleaning. Many ways which seemed good have proved worthless—in fact, are now known to be harmful. So we waited three years to let dental authorities prove that this method was right.

The film is albuminous matter. That fact suggested pepsin, which is albumin's digestant. Pepsin is known to digest albumin, and that means its dissolution.

But Pepsin is inert until activated. And the activating agents are acid. The usual acid—hydrochloric—is destructive to the teeth. So pepsin for long seemed

Then an acid salt was found-a neutralized acidwhich does not harm the teeth. In fact, the teeth themselves are largely formed from it. This acid salt will activate pepsin. It is this discovery which has solved the problem of that film.

pepsin with this activating agent. The purpose is to dissolve the film so that brushing will remove it. Five governments already, by granting patents on this combination, have recognized its newness and efficiency.

Pepsodent is now supplanting all former methods of teeth cleaning. It has been subjected to thousands of clinical tests. Its results have been proved beyond

It has won the endorsement of authorities who are recognized all over America. And countless dentists in their practice have proved that it does what they,

Now, on their advice, we are telling the facts to you.

This is to urge you to make a one-week test. The coupon below will entitle you to Pepsodent for it. See what it means to you.

Note how clean your teeth feel, even after one application. Note how quickly the slimy film disappears, how your teeth grow whiter. And how they soon feel as they feel after a thorough dental cleaning.

Mark how pleasant its use is, how unique and complete its effects. One week will convince you. You will never return to any method which leaves your teeth coated with film. Cut out the coupon now.

## ONE-WEEK TUBE FREE
