THE COMING CAMPAIGN

Governor Brumbaugh's public statement on the gubernatorial succession is the first gun in the big campaign which is about to open. He indicates clearly that there has been misrepresentation of his administration acts and policies in certain quarters and that under no circumstances will he support candidates brought forward by certain political interests. This five minutes. Of course, there will be personal rivalries, and differences of opinion will arise on every hand, but when the standard of the party shall have been placed in the hands of the successful gubernatorial candidate it will be the duty of all factions to rally to the party colors and give earnest support to the men who have been fairly chosen as the Republican nominees.

It is not fair to involve the party in an unnecessary and hopeless factional quarrel beyond the date of the primary. To-day the Democratic party is in power at Washington through Republican division and it is the hope of the Democratic control that is shameful that these men, so well qualified to serve their country in this crisis, should be allowed to stand in the background whose service as chairman was rewarded with the Lebanon post office. There are signs of sanity here and the symposium of editorial opinion from Republican publishers throughout the State, as presented in the columns of the Telegraph recently, indicated the general desire of the Republican forces to get to-

that the length of the war and the of the Republican forces to get together and fight the common for instead of fighting each other.

Within the last twenty-four hours the Republicans in Congress have indicated a purpose to reorganize in some effective way so as to maintain a strong alignment against the encroachment of the party in power. There is an insistent demand for a restatement of party principles. Straight talk is necessary from now on and nowhere is the maintenance of the Principles which have made the Republican party great so absolutely necessary as in Pennsylvania.

Now is a good time to push the Americanization of aliens. Those who want to become citizens of the United States should have the opportunity; those who never intend to become citizens ought to be given to understand that the time is rapidly approaching when their room will be more desirable than their company. Thousands of aliens have always intended to become citizens of the United States, but they have neglected their opportunity. There is no excuse now to put off their patriotic intention.

Some of the big truck trains that are moving across Pennsylvania from the motor vehicle manufacturing centers to the seaboard can be routed so that they will pass through Harrisburg. There are scores of trucks now on the move through Pennsylvania, part of a formidable army of transportation men who are to form cogs in the great military machine to down the Kaiser. They enter this State above Pittsburgh and proceed over the Lincoln highway to Chambersburg where they are diverted to the vari-ous points on the seaboard where they are wanted. Some find their way to cantonments and some to supply centers. Word came to this city a few days ago that another big squadron of trucks was about to start. It is said that on one day twelve trains of thirty trucks each started for the seaboard, all passing through Pennsylvania. These trains are manned by sixty men each and are loaded with military stores, including parts of trucks themselves. They serve a triple purpose in their trip. They relieve congestion by hauling some freight, give chance to get into running order or be broken in, as the phrase goes, and they give the men in charge practice in moving in companies. What is more they are a visible part of what this nation is doing to build a great war machine and the very appearance of the great dun-colored wagons is something to thrill the man or woman who sees them go by. And that is why some people think that truck trains should be routed through Harrisburg. Highway Commissioner J. Denny O'Neil, whose work to keep the roads open for this truck traffic has been officially commended from Washington, said yesterday "There is no reason why some of these truck trains commence gets busy I think that you can see some of these trains passing through your chamber of Commerce. gets busy I think that you can see some of these trains passing through your city on the way to the coast. I can tell you it is a great sight, these long trains of trucks, going day and night, all forming part of the supply system of a great army." they are wanted. Who killed the wild cat in Dauphin county? The records of the State Game Commission show that one wild cat was killed in this county last year, but the name of the man who has the honor is not given out. And it is interesting to note that sixty-one gray foxes and twelve of the red variety were killed in this county. Big Chief of the Pelts Cleary, of the Game Commission, says that there are numerous gray foxes all through this country. They are chiefly in the sections close to the farming country and are a nuisance to the farmers. But few people would imagine that sixty-one would be killed in this county.

THE INCOME TAX DELAY

It is said that the blanks necessary for making income tax returns will be ready "next week." Half of the first month of the period for making the returns will have passed by then before a single return is made, and the period was none too long at best. Millions of tax money is tied up until this uncertainty is past, and the labors of taxpayers and taxcollectors are increased in intensity. None of the various explanations are convincing.

sity. None of the various explanations are convincing.

It is said that the blanks were prepared, and were recalled to correct errors, and that the work is all to be done over again. The suggestion that the errors were in the blanks is less likely than that they were in the law. Daily interpretations are announced for which there is no basis in the words of the statute, but without which the law could neither be worked nor commend itself to the taxpayers.—N. Y. Times.
