MONDAY EVENING.

Wage Commission Starts Work on Business Basis:

the Brotherhoods First

demands have been presented.

Labor leaders will be called in and the recommendations of railroad presidents and other executives will be heard. Most sessions will be public and the scope of the investigation will depend largely on developments.

ments.
Secretary Lane said the commission planned to travel as little as possible, but that it probably would use the investigating machinery already established by the Department of Labor.

ready established by the beyond fabor.

"We want to deal direct with railroad men," said the secretary, "and
get their views at first hand. This will
be a businesslike investigation and
in the end we want to give Director
General McAdoo the best available
information on the whole labor situation boiled down for his final ac-

Number Three Thousand

Rutherford yards was a busy place yesterday. Freight was moving in good shape all day.

Traffic conditions on the Pennsy are showing big improvement. Yesterday was clean-up day.

Pennsylvania passenger train No. 2335, an accommodation train between Olean and Rochester, N. Y., northbound, was derailed near Cuba, N. Y., yesterday. Two or three passengers were shaken up. None was seriously injured.

The first sweeping order issued by the local branch of the Federal Fuel Administration relative to the commandering of coal was made to-day when sixty-seven carloads of bitumincus coal shipped to Reading were seized. The fuel was consigned to iron and steel mills and other industrial concerns.

President Samuel Rea's appeal to the officers and employes of the Pennsylvania Railroad system, calling upon them for renewed efforts in their work and loyal support of the Government, has been reprinted in the form of small leaflets, a copy of which will be placed in the hands of each one of the quarter-million men and women on the payrolls of the system, both east and west of Pittsburgh. Copies of the appeal, in the form of a small poster, have also been placed on all employes' bulletin loards.

Trainmen in Service

RIGHT OF WAY TO COAL TRAFFIC GETS PROMOTION

to Concentrate on Special Movement Today

Orders issued to the operating forces on all divisions of the Pennsylvania railroad to concentrate every effort and utilize all facilities, during the period of partial indus-

during the period of partial industrial suspension ordered by the fuel administrator, upon the movement of coal have been received here.

The movement of foodstuffs and other necessities will be properly provided for, and also the transportation of freight needed for the war industries, but in view of the fuel situation it is felt by the management of the railroad that it must receive the first attention.

The efforts of the operating forces are being centered upon moving as large a number of empty cars as possible from eastern points to the bituminous and anthracite coal mines reached by the lines of the Pennsylvania railroad. The object of this is to secure the largest practicable supply of cars at the mines to-morrow morning ready for loading. The full capacity of the railroad will then be utilized to rush the loaded cars to destinations as quickly as possible after they are filled.

Coal First To-day

Coal First To-day

Coal First To-day
In order that the movement of coal may be as free and unimpeded as possible to-day, it will, for the day, be given the right of way over all other eastbound freight traffic, with the exception of livestock.

In taking this action the Pennsylvania railroad is guided not only by the necessities of the situation, but is also complying with the following order, just issued by Director General McAdoo, through A. H. Smith, assistant to the director general of railroads:

"In view of the order of the fuel administrator for a five days' cessation of industrial activity in this territory for the purpose of accumulating and distributing an ample fuel supply, I urge and direct that every possible effort be made by the railroads to move coal and to co-operate to the limit with the fuel administration for the accomplishment of ithe desired end. I hope that the officers and employes of the railroads will do their parts so effectively that there may be no further occasion for interruption of the industrial and grownal activities of the nation."

MILK NOT TO GO UP

MILK NOT TO GO UP

According to W. J. Kimmell, secretary of the Dairymen's Association of Dauphin and Cumberland Counties, there is no truth whatever in the report that the price of milk, wholesale, is about to advance. He says: "Rumors have been circulated recently that the last quarterly meeting was called for the purpose of raising the price, but I wish to state that not one single word pertaining to the advancement of the price was uttered by any member of this association." Washington, Jan. 21.—Director General McAdoo's newly-appointed railroad wage commission, headed by Secretary Lane met to-day to take up labor questions pending before the railroad adm#nistration, and will devote afternoons for several weeks to hearing and investigating complaints and petitions.

Secretary Lane said the wage demands of the four leading railroad brotherhoods would be heard first and later consideration would be given to other definite wage requests. Before the investigations are concluded it is planned to inquire into labor conditions, wages and living expenses for all classes of railway labor, regardless of whether definite demands have been presented.
