*Petrograd (Monday), Jan. 21.-Precredit from running an uncontrolled course.

"Goods and credit," says the report, "must be saved the utterest of our ability in order to check the upward movement of prices and in order to free for the use of the government the goods and savings required for the winning of the war."

The present condition of a greatly expanded currency will be improved, the board believes, "as the public performs its duty of absorbing the government loans out of savings."
Before the third Liberty Loan, the report adds, Federal Reserve Banks must reduce their investments to strengthen reserves and avoid further expansion that has accompanied the last two Liberty Loans. The board does not say specifically how it proposes to do this.
