

KEEP THE WHEELS OF THE AUTO INDUSTRY MOVING

IT'S TO YOUR INTEREST AS WELL AS OURS

It's the third largest industry in the world—exceeded only in importance by the railroads and the steel mills. And this helps to build the steel and railroad industry bigger. See the automobile show and think how important a factor it is in the continued prosperity of the nation.

Think of the thousands of garages and repair shops that have supplemented the livery stables and horse-shoeing establishments. Like public utilities, these service stations and supply depots represent a great industry, in addition to the motor car factories, makers of tires, accessories and supplies.

Our interests are mutual. The motor car helps you and your business as well as ours. Uncle Sam expects you to do your bit and your best to keep the wheels of industry moving. It's of vital importance to the nation. Back it. Buy if you can, but boost if you can't.
