By Associated Press With the American Army in France, Tuesday, Feb. 5.—American artillery kept up a continuous fire on the enemy batteries throughout Tuesday and the Germans responded with the result that there was lively shelling along the entire sector. At the same time the American antiaircraft guns were busy repelling attempts of enemy airmen to cross over the American lines. Two German airplanes finally abandoned the attempt, after having been shelled heavily. A member of the military police to-day found three little French children, a girl and two boys, wandering along a road immediately behind the front which is shelled very frequently by the enemy and is considered very dangerous.
