Shelters and defenses were destroyed and 100 prisoners captured. On the American front in France there has been no activity of consequence.

Germans Build New Defenses The Germans are reported to be working assiduously building new defenses and bringing fresh troops to the western front. The Associated Press correspondent at French headquarters says the Germans now have 135 divisions, probably 2,310,000 men, on the front between the North sea and the Swiss border.

Tonnage Losses Heavy Disclosure of British production in 1917 shows that the tonnage sunk last year by submarines was three times as great as that built in the United States and Great Britain. The combined total of production is slightly more than 2,000,000 tons, while sinkings by submarines have been estimated at 6,000,000 tons. Greatly increased production is expected in 1918.

The British House of Commons late passed an amendment offered by a Radical member which regretted that war monopolized the energies of the government. The government ministers have declared passage of the resolution would cause the resignation of the Lloyd George cabinet. In the House, Lord Robert Cecil, Minister of Blockade, said the British government was giving attention to a League of Nations and that he had prepared a scheme for it.
