

FINAL STEPS FOR NEW QUARTERS

Superintendent Shreiner Will Arrange For Placing of Departments From Hill

The final steps regarding the use of the Star Independent building on South Third street for departments of State government will be taken next week when the papers will be presented. Meanwhile Superintendent Shreiner, in charge of the Board of Public Grounds and Buildings, will make plans for arrangement of offices, estimate the cost of remodeling which will be done by the owners, and gather such information as will be needed in making of the lease.

It has not been determined what departments will be located in the building, but possibly some of those which will have to move because of demolition of structures in Park Extension. Some of the smaller departments in the Capitol such as Mines, Forestry and the like and others which are scattered may be assembled there. Superintendent Shreiner is still working on details of his scientific space plan for the housing of departments which will remain in the Capitol according to their needs.

The general idea is to have the departments move during the summer if the changes can be made by that time.

The Hunter building, which will house the State Insurance Fund, will be ready in a month.

MUST DISPOSE OF BOROUGH REFUSE

Borough Asks For Bids to Remove Garbage in Steelton

In a statement this morning Steelton officials asked for bids for the disposal of garbage in the borough. At a joint meeting of the finance and highway committees in the council chamber, late yesterday afternoon, it was decided to ask for bids for the disposal of garbage alone. This disposal of ashes will be taken up later.

Bidders are requested to have their estimates in the office of Borough Secretary Charles P. Feldt, within five days. After the bids are received it is likely a special meeting of council will be held to take action on the proposition.

Immediate attention to the disposal of refuse is needed councilmen say as steel company officials have refused to allow the borough to dump refuse on company property. Councilmen claim that the disposal plan is the only solution of the problem. Developments of the last month indicate that the pigery plan will be put into force. The problem is one that needs careful consideration, an official said to-day. The matter has been talked of for several months but not until the steel company issued orders prohibiting dumping on its premises was the proposition taken up officially.
