

AMERICA MUST COME TO THE AID OF CIVILIZATION

Dr. Bagnell, in Speaking to Liberty Loan Workers, Declares U. S. Must Help

GOOD WORK!

"I want to congratulate Harrisburg on having kept Scott Nearing from speaking in this city. We should keep up the good work. This is not a time when we should permit seditious speakers to come among us. It is a time, rather, when we should know just where all of us stand—when we should know that all Harrisburg is 100 per cent. for the Government. We must deliver the goods, so that the boys at the frontier of Liberty will know that we are behind them."—Dr. Robert Bagnell, at Liberty Loan meeting last night.

Although the Harrisburg district's quota in the third Liberty Loan is only \$2,500,000, the workers who canvass Dauphin, Perry, Juniata and Cumberland counties are going after bond sales as if the total was \$5,000,000. That much was evidenced at the Harrisburg Club last night, where a meeting was held of the committee which will direct the campaign in the industrial establishments of the city.

The campaign among the thousands of employees of the scores of industrial plants by the dozens of workers will begin next Tuesday morning—following Lieutenant Pat O'Brien's talk in Chestnut Street Auditorium Monday night. It will continue for two weeks, and an effort will be made to have the plants "cleaned up" before the drive on the home front begins. That home drive will occur during the week of April 22.

Dr. Bagnell's address last night made a decided hit with the industrial committeemen. The well-known clergyman pleaded that an effort be made to keep up the morale of the folks at home.

"The morale of the soldiers and sailors is fine!" he declared.

Dr. Bagnell also urged speed in America's preparations. He said that the nation is apt to overlook the big things that have been done in the getting ready for real war, while particular attention is given those things in which there seems to have been a falling down. He paid tribute to Secretary Daniels and the work the Navy is doing. Then he said:

"The Germans are now getting ready for the second phase of their giant offensive—the greatest battle in the history of the world. And I believe the Allies will hold them, but when they have held them it may be that they will be staggering. I recall the story of Wellington on the bloody field of Waterloo. Napoleon had been delivering crushing blows at Wellington. The little Emperor—the man who had made the frontiers of kingdoms oscillate on the map and who changed the destiny of Europe—held in reserve the famous Old Guard. And Wellington had in reserve the Scottish Grays, then which there has never been a better fighting unit. It was late in the afternoon. Napoleon turned to an aid and said: 'I would to God that Blucher or night would come to our aid.' I imagine the French and English are of the same frame of mind. They would to God that America would come to their aid. And we MUST go to their aid. Those of us who cannot fight must hold up the burden on this side—and not the least part of that burden is furnishing our Government the money it needs. Let us back our boys with bonds—let us back the flag with bonds."

Lisburn Pledges Its Aid to Liberty Loan Campaign

Lisburn, Pa., April 4.—Several thousand dollars in subscriptions to the Third Liberty Loan bond issue were pledged here last night at a patriotic mass meeting held in the Methodist Church under the auspices of the Women's Liberty Loan Committee of the Mechanicsburg district. The church auditorium was filled despite the inclement weather. A good program with music and recitations was given. Included among the speakers were Mrs. R. C. Hart, Mrs. Corda Kunkle, Mrs. Ray W. Happer, George Lloyd, chairman of the county Liberty Loan committee, and Mrs. Margaret Moser, chairman of the county women's committee. Miss Julia Hart, of New York, presided.

Build Bigger Ships, Is Order by U. S. Board

Washington, April 4.—A general increase in the size of all ships built hereafter was ordered yesterday by the Shipping Board. The tonnage of experimental concrete ships was increased to 7,500 tons and construction of three more at San Francisco was authorized.

Wooden ships hereafter will be 5,000 tons instead of 2,500 tons. Steel ships built on the Great Lakes will be 5,500 tons, and construction of a 10,000-ton steel vessel on the lakes, which would be brought through the Welland canal to the sea by cutting it in two and turning it over on its side, is under consideration. The more economical operation of large ships was the deciding factor in making the change.

\$1,000 For Work Among Foreigners Near Annaville

Annaville, Pa., April 4.—At a recent meeting at the United Brethren Church when the congregation pledged \$1,000 for the support of Miss Regina Bigler, a medical missionary at Canton, China, a member of the church gave a donation of \$1,000 for home missionary work among the foreigners employed in the stone quarries west of Annaville. The name of the donor was withheld.

TAKE RELATED RETURNS

Extraordinary leniency is being shown to persons tardy in declaring their income tax returns. Monday night was to have been the dead line but the Collector of Internal Revenue was receiving returns last night and forwarding them to Lancaster headquarters. This will probably be continued some time but just the same the punishment has been decreed of \$20 to \$1,000 fine for not responding by April 1.

MOTOR BOARD TO MEET

The board of governors of the Motor Club of Harrisburg will meet at the headquarters, 109 South Second street, to-morrow evening 8 o'clock. Cards have been sent to the members by the secretary, J. Clyde

Women of America

Our soldiers need your help —

SAVE the flour they need!

A single pound of flour saved every month in each of our twenty million homes would mean an annual saving of 1,200,000 barrels of flour.

And every barrel saved is daily food for 300 of our fighting men. But we must save more! Do the women of America realize this?

Wheat is needed to win this war

The food Administration asks every woman and man to conserve the Nation's wheat supply.

The Bakers of America are under regulation of the Food Administration. The bread we now make meets with the Government's regulation for wheatless days.

The bakers, in co-operation with the Government, are making a real and definite saving of wheat. We are making our bread with 20% other cereals than wheat flour. This is the Victory Loaf which you should eat every day and may eat

on wheatless days if no other wheat substitutes are available. But you can help in other ways, too.

Every woman in this country can help by following these suggestions.

Definite ways you can help

- Have one no-wheat meal every day in your home.
- Observe two wheatless days each week, Monday and Wednesday. Serve only bread and rolls containing not less than 20% of other cereals than wheat flour.

See that there is no waste in your home. *Save that slice a day.*

Buy only as much bread as you can eat, and eat all you buy.

Order your bread regularly in advance. We will then bake only as much bread as will be sold and eaten.

Begin today to do your part

The bread our Allies are now eating contains a far smaller percentage of wheat flour than the Victory Bread which the Food Administration wishes you to use.

You are giving your sons—they are giving their lives—in this fight for the World's Democracy. Will you send them the food so necessary for their health and victory?

Every barrel of flour saved will make daily bread for 300 soldiers.

Bakers are making bread that means a real and definite saving of wheat
