

FIRST SHIP BY U. S. STEEL TO BE DONE IN MAY

Launching Takes Place at Newark; One Every Ten Days Thereafter

Hoboken, N. J., April 16.—The first ship constructed at the Government's request by the United States Steel Corporation will be launched at Newark, N. J., by the middle of May, and the corporation's two yards at Mobile, Ala., and Newark will be prepared to turn out a completed ship every ten days.

"We did not wish to go into the business of building ships," Mr. Gary said. "This was entirely out of our line, but we were approached by gentlemen interested in governmental affairs to see if we could assist in building ships when they were most needed."

"After careful study we decided that we could build ships at least as cheaply and as rapidly and get into the business as quickly as any other concern. We started two plants, each having ten ways, one located near Newark, N. J., and the other at Mobile, Ala."

"We started the construction of the Newark plant in August of last year, and we expect to launch the first ship by the middle of May, and complete the ship between the first and fifteenth of July. The plant at Mobile is a duplicate of the one at Newark. The two yards together will turn out a completed ship every ten days."

WILL PRESS INCOME RETURNS Washington, April 16.—President Wilson yesterday announced a new organization of the revenue agent force with John D. Murphy, of Boston, as chief revenue agent to succeed L. G. Nutt.

LOAN OFFICERS ELECT

The Pennsylvania Building and Loan Association met last evening in the courthouse and elected the following officers: J. Henry Spicer, president; W. L. Gardner, vice-president; H. A. Rutherford, secretary; Henry W. Gough, treasurer.

FLYING WITH SHAFFER LUCK IN THE AIR

LETTERS FROM A DAUPHIN BOY TO HIS MOTHER

Somewhere in France, Feb. 21, 1918. Dear Mother: I hope you received that last long letter and its length didn't prevent you finishing your housework.

"I don't know how muddy this country is so fortunately, you can't imagine how much of said real estate rests on the floor. And now that you have been properly shocked, I'll proceed to relate the latest news."

"It just hit me to-day, so I can't be blamed if I'm a little out of balance. It seems I am not only going to be armed with a machine gun, but responsibility and a camera as well, and I haven't decided yet whether to be tickled or mad. You remember, I told you we are now flying the Morane Parasol monoplane, so to-day the Captain comes around and tells me the high mucky-mucks are going to put cameras on several of these fast birds, and I was one of the experiments. And as I said before, I don't know what to think. My mechanic is plucked and disgusted, and some of the pilots talk as if it is disgraceful, but on finding that I had not asked for the photo work they pity me—and there you are!"

"The Captain asked me what I thought about it. I said I preferred fighting alone, but he reassured me by saying that when I wasn't taking pictures, I could be in the front line. That put a different face on the matter and I am trying to persuade myself that I am going to like the hand fate has dealt me. It's a cinch."

Plenty of Thrills There will be plenty of thrills in the new work, for it will necessitate flying way into Germany dodging shrapnel and Boche, to get the picture, and doing some more dodging bullets and Boche to get back with the picture. And that is the part I don't like, for it's against orders to fight when taking pictures. You can see that the point is to get the picture and then beat it for camp. This playing tag in the air is thrilling indeed, but doggone it, I don't want to be it all the time, so when some persistent Boche gets shooting away at my tail, little Walter is quite likely to forget orders and a valuable camera, and picture, swing around and take a few shots himself.

Then again, this mounting a camera takes time, which means another week of loading around, something I'm getting very sick of, since no letters have arrived for two weeks. What's the matter?

Poor Christmas Presents All the Christmas fountain pens burst. It makes me chuckle though to think of the weapons I am armed with—shoot at Fritz with my machine gun and then when he sees the "birdy" take his picture. However, before I go any further, let me thank you for that box of mixed cakes which came some days ago. Yes, sad to say, they are all gone and all that remains is a pleasant memory and a desire for more.

As Putnam says, it's hard enough to write a letter with another for inspiration, but with no letter and nothing happening, it's impossible. That's the fix I'm in, so I'm rising the walling strains of the flute and cello as inspiration. Yes, the owner of the flute finally arrived via the railroad, having tried twice to fly here. But he went "in panne" both times and I suppose hadn't nerve enough to ask for another new sax, which he ruined by dropping in three hours and fifteen minutes. Major Brown was accompanied by George Duzane, a Liberty motor expert.

The motor has been run a total of nine hours and on the trip from Langley Field did not miss a stroke, according to Mr. Duzane, who also said its vibration was much less than had been expected.

TO LECTURE ON INDIA The Rev. H. S. Hershey, pastor of the Green Street Church of God will deliver an illustrated lecture on India, in the church to-morrow evening.

LIBERTY MOTOR STANDS Test of 325 Miles

Mineola, N. Y., April 16.—An airplane fitted with a Liberty motor and piloted by Major Roy Brown, of the United States Signal Corps, arrived at the aviation field here yesterday, after completing a test flight of 325 miles in three hours and fifteen minutes. Major Brown was accompanied by George Duzane, a Liberty motor expert.

MEINCLAIR SAYS MORE Tractors Are Coming

Frank B. McClain, Lieutenant Governor and chairman of the State Tractor Service Committee, issued a statement last night assuring the farmers that the tractors are being placed abroad that satisfactory progress is being made by the committee in distributing them to farmers. His statement reads:

"Tractors are now at work in seventeen counties out of the total of sixty-seven in Pennsylvania. They are as follows: Lehigh, Columbia, Butler, Bradford, Crawford, Blair, Delaware, Bucks, Potter, Montgomery, Erie, Lawrence, Washington, Mercer, Tioga, Venango and Huntingdon."

"One tractor will do in a day about three times as much work as a man, a team and a plough. The tractors will be worked fourteen or sixteen hours a day with double shifts, one operator working seven or eight hours, being relieved by another who will take a similar tour of duty. It is estimated that a man and a team can plough about three acres per day, whereas a tractor can plough twelve."

"About a score of machines are now at work and others will be on the job in the course of a few days."

REPORTS OF ACTIVITIES EXAGGERATED, Attorney General Writes to Congressman

Washington, April 16.—Reports of enemy activities in the United States are grossly exaggerated, says Attorney General Gregory, in a letter to Representative Currie, of Michigan, made public last night by Mr. Gregory.

Replying to a letter from Mr. Currie, saying that a "feeling exists throughout the country that the government is dealing too leniently with spies and dangerous enemies," the Attorney General explained at length the extensive work of the department of justice in policing the country under war conditions. He emphasized the difficulties under which the department is laboring, including the lack of necessary laws under which to punish offenders.

"The public assumes," Mr. Gregory wrote, "that there is a great deal of enemy activity going on in this country, and it is but natural that vague rumors are magnified into definite and sensational stories. The talk of damage done by enemy aliens in causing incendiary fires is an illustration of this. Repeatedly, both in reputable newspapers and in publications got out by citizen societies, exaggerated statements are made as to the amount of damage."

"Statistics show that considering the vastly increased value of merchandise and plants, the actual fire loss to property of all descriptions in 1917 was not appreciably greater than that of the year of 1913. Likewise, the report recently made by the national board of fire underwriters shows, in substance, that in the last year no fire has been clearly proved to be the work of alien enemies, and at a recent conference of the treasury department with all the men in all departments charged with protection of plants and supplies, it was stated without dissent that no instance was known to have occurred within the last year by alien enemies."

"It would be absurd to say that every hostile act has been successful. It would be equally untrue to say that every enemy agent or propagandist at work in this country has been discovered. I do, however, assert that every possible effort is being made to ferret out and punish activities of this character."

"The department's bureau of investigation, for a long time, has been operated on a war basis. In addition, the department has accepted the services and to a great extent the cooperation of more than 200,000 citizens of proved loyalty, systematically organized throughout the country as an auxiliary to the war effort. It is a fair statement to say that the country has never been so thoroughly policed in its history by the federal authorities as it is to-day."

"In connection with enemy alien activities, you will recall that under the most conservative estimate there are in this country more than 450,000 Germans, 600,000 Austrians and 400,000 Hungarian enemy aliens. (I. e., unaturalized males upward of 14 years of age, and, estimating there to a family, there would be within the United States about 4,000,000 persons who are either male enemy aliens or members of their families. If you will be in mind that we have quite as much, if not more, trouble with native and naturalized Americans as we have with enemy aliens, you will get some idea of the magnitude of the work which daily confronts this department."

"Most of the disorder throughout the country is caused by the violation of laws relating to disloyal utterances. My department has succeeded in securing the conviction of more than 250 offenders in different parts of the country and in obtaining the imposition of sentences in some cases of fifteen and twenty years imprisonment."

"Another serious defect in the legal situation is the fact that there is no law providing for the control of departures from or entries into the United States by those more than those who are alien enemies."

NATION'S ENEMY IS GREGORY SAYS

Reports of Activities Exaggerated, Attorney General Writes to Congressman

Washington, April 16.—Reports of enemy activities in the United States are grossly exaggerated, says Attorney General Gregory, in a letter to Representative Currie, of Michigan, made public last night by Mr. Gregory.

Tech High Seniors to Hold Dance For Entire School

Members of the Senior class at the Technical High school will hold a dance this evening at Hanshaw's hall in which the entire school has been invited. A school dance will be held at Winterville the first week in May. A committee is working on the latter event and expects to make it one of the largest social affairs ever held by Tech students. The committee is composed of the following: Seniors, Harry Miller, Ralph Brough, Ralph Stauffer and Jerry Frook. Juniors, John Richards, William Hoerner, John Connor and

Victor Bluh. Sophomores, Ross McCord and "Buddie" Lingie. One of the most interesting parts of the chapel exercises at Tech is the salute and pledge of allegiance to the flag. The entire student body and faculty stand at attention and sing the pledge. Lloyd Cole is color bearer. Visitors to chapel are particularly pleased with the ceremony.

The 650 students in the building marched out at a fire drill yesterday afternoon in ninety seconds. Grades for the last month will be turned in for all subjects this Friday. Reports to the parents will follow shortly.

Members of the college prep sections are looking forward to the return of Professor W. D. Meikle, who has been absent from school the past ten days because of an attack of grip. He will resume his work to-morrow.

CHANGE MEETING PLACE Announcement was made to-day that the afternoon conference to be addressed by William A. Maw, president of the First National bank of Philadelphia, Friday, will be held in the Board of Trade auditorium instead of Farnstock hall, as was originally announced. Mr. Maw will speak in the interest of the Liberty Bond drive.

An evening mass meeting will be held in the chestnut street auditorium. The Philadelphia banker will also address this meeting.

TO STUDY BIRDS DURING HIKE INTO COUNTRY Bird lovers will meet Saturday afternoon for a hike through Italian Park, across the railroad viaduct and through the lower end of Wildwood Park. This was decided last night at a meeting of the bird section of the Harrisburg Natural History Society held in the curator's room of the State Museum. Miss Grace Tatum of the Central High school, and Miss Clara Hershey, of Steelton, addressed the meeting on the subjects, "The Migration of Birds" and "Birds of the Warbler Family."

Persons who desire to join the members on this hike, should meet at Third and Seneca streets, Saturday afternoon at 1.30 o'clock.

Dives, Pomeroy & Stewart

Eat But Eat Wisely Without Waste Just a little less butter and fewer dried foods will do much to make happier the lives of those who are sacrificing so much "over there." The food supply of the world is short and getting shorter. If you eat more than you really need, you are taking that much away from men women and children who are barely existing. Besides, what you do eat will cost you more as supplies decrease. You owe it to yourself to waste nothing.

New Silk Dresses: An Unusual Showing Designed For Street and Sports

They are unusual both from a viewpoint of style and materials and the details of each frock are worked out so skillfully as to leave an unmistakable mark of distinction.

Among the most favored weaves are indestructible voiles, beautifully designed fourards, smart patterns of taffeta and solid crepe de chine and Georgette crepes.

The styles express newness in every stitch, the lines are carefully worked out and among the more recent developments are to be found many attractive dresses with tunic or surplice.

The color range is satisfyingly complete. Sizes for misses and women — beginning at \$18.50.

Dives, Pomeroy & Stewart. Second Floor.

Dainty Pink Lingerie of Fine Silk and Sheer Cotton

Exquisite underwear for Spring and Summer days is fashioned of crepe de chine, fine seco silk and soft batiste in delicate pink shades.

Pink crepe de chine camisoles; trimmings of lace insertion, georgette crepe or ribbon, lace or ribbon shoulder straps. . . . \$1.00, \$1.25, \$1.50 to \$3.50

Pink crepe de chine envelope chemise; lace trimmed or tailored styles; ribbon or lace shoulder straps. . . . \$2.95, \$3.50, \$3.95 to \$5.95

Pink crepe de chine gowns; lace yoke and sleeves or tailored styles, trimmed with hand-embroidered yoke. . . . \$5.00, \$5.50, \$6.95 to \$10.00

Pink batiste and pink seco silk envelope chemise; tailored styles, ribbon or batiste shoulder straps. . . . \$1.00, \$1.25 and \$1.50

Pink batiste gowns; tailored or lace insertion trimming. . . . \$1.50
