

Uncle Sam's Sentinels of the Sky

No unit of the fighting strength of this nation will play a greater part in bringing about the war's successful end than the sky fleet.

America's War Eagles--the eyes of the army--will guide the land forces--detect the sneaking submarine--bomb enemy backlines and observe the moves of the firing line.

No expense should be spared to properly build a sufficient number--adequately equip and man these vitally necessary, powerful, battling and bombing airplanes--so that AMERICA WILL RULE THE AIR.

ALL OF THIS TAKES MONEY.

THE SALE OF LIBERTY BONDS
WILL SUPPLY IT.

Have you bought yours?
