waves. Lieutenant Wallower was a member of the Trowbridge unit and was caught at the front by the first big German drive. He was evidently with the badly cut up British Fifth Army, which bore the brunt of the attack, and the detachment with which he was serving was in the midst of the hottest kind of action, all of its officers being killed or incapacitated. The young American officer was the only one left and he suddenly found himself in command of the remainder of the British Tommies. For four days and nights without sleep or rest he was in the first line trenches in this capacity, during which he held off the Germans in two attacks and led his men in two counterattacks, coming off without a scratch in fighting that left his command badly shattered.

Open Fighting

It is very hard to imagine the condition of this front. No trenches as yet, no hills, in fact no protection excepting the holes we dignand believe me, we dig them fast. By walking to the outskirts of a small village where one of our posts is located, we are able to look over two level fields, a distance of about one kilometer, and see the German forces. We can see the fire flash from the Boche guns before we hear the report. It is needless to say that the roads are entirely exposed to Fritz and he certainly does shell them, but this is very costly to him as he receives about ten back for every one he sends over. The French are very liberal in this matter. Fritz has advanced as far as he is going to in this section, and before long he'll be on his way back to Berlin.

Shell Strikes Cars

Early this morning a shell fell alongside of Dougy's car and mine, with the result that we lost six tires and the cars received many holes from the shrapnel—were eighteen holes in my car, ranging from the size of a pea to an inch in diameter. To date our section has had four cars hit and one of our boys suffered a slight shrapnel wound in his left shoulder which necessitated his going to the hospital. The other night a shell came through the building under which we were located, caused considerable damage but did not injure any of us.

We are going through an experience of a lifetime. Regardless of the danger, it's great sport. If the first shell doesn't get us the second won't, for boy, we won't be near that spot. It's a great life if you don't weaken. Well, it's past hash time and to be late means to do without.

This leaves us in the very best of health and spirits, anxiously looking forward to our arrival in dear old Steelton. Close with the very best wishes.

often called the "iron duke," showed his courage and strong will at Waterloo when he helped defeat Napoleon. It takes greater courage, vim, vigor and lasting qualities to win the battle to-day in the frontline trenches than it did in olden times. Energy is a natural outpouring of a healthy body. It does not spring up in a night. Build up that which Nature has given us by taking a compound of iron, recently compounded by Dr. Pierce, and named by him "Irontic." This iron-tonic tablet is easily taken up by the blood.

The prime necessity of life s health. Inject red blood into your arteries and become efficients Success often dis-

appears for lack of iron. Take the average man and woman on the streets, for example. Watch them go plodding along, no spring, no elasticity, no vim. What one needs is spirit, energy, the power to force one's self into action. If you try "Irontic" tablets, Slight damage was caused by fire at 38 North Front street this morning starting from an explosion of an oil stove. The fire was discovered by Edward Collins, who was sleeping in the second floor of the building. The man jumped out the window and ran to Front and Locust streets, turning in an alarm. The Citizen fire house is but a few doors from the building but Collins was so excited he ran to the tox to turn in the alarm. The building is owned by Max Levitz.

power to force one's self into action. If you try Ironic tables, the brain responds to the new blood in circulation; the body is ready to fight against stagnation, which holds you in bondage. You gain in vim, vigor, vitality. Try it now. Don't wait, Today is the day to begin taking "Irontic" tablets. A little energy saves the day. "Irontic" tablets make rich red-blood. With red blood comes courage, then comes success, which leads to more and more success. Dr. Pierce's "Irontic" tablets are to be had in 60 cent vials at most drug stores If you wish to test them send 10 cents to the Invalids' Hotel, Buffalo, N. Y., and get a trial package.

## Constantly diverting Street Car materials to war purposes--

General Atterbury has made it clear that America has built a great railroad system for Uncle Sam's use in France.

He says there must be greater railroad facilities in France and that there is a greater need for boats.

Boats are the link between this country and Europe, the mainstay of troop and munitions, transportation.

This clearly emphasizes the tremendous drain on steel-steel will go directly for war purposes more rapidly than ever before.

This movement of the steel resources of the Nation in the direction for war purposes is absolutely right!

But you cannot change

the fact that it holds up street car materials.

And, like a shortage in any line, or a greater demand for a commodity, the price automatically goes

But high price or no, we must have the street car equipment and so we pay the price, and we're glad to get the goods whenever we can.

Of course, it has increased the cost of doing business. Everything in the street car business has gone up in price and the fare has remained the same.

It naturally follows you must give less for what you get or get more for what you give.

You want street car service and we want to give it to you.
