### PROMISE OF 'HOME' COOKING LURES MEN BACK TO WORK

#### Laborers Who Deserted Posts in Middletown Government Plant Post Liberty Bonds as Evidence of Good Faith

"You should be ashamed of yourself to take money from Uncle Sam when his soldiers are fighting for you in France," said Casimer Gaeta, a Capitol Hill employe, to nine Italians in the court of Alderman Hilton, where last evening they had been taken for answers to charges of defrauding the government. "You should be doing all you can to help the United States," said Gaeta fiercely to his Latin compatriots. "This is one glorious country. Italians should be for the Stars and Stripes. You should pay the money back you took as railroad fare. You should be ashamed of yourselves to run away from working for Uncle Sam. Shame, shame," he shouted accusingly.

The Italians were part of the 17 workmen brought from Rochester, N. Y., to labor for the ordnance department at Middletown. They had been arrested yesterday for leaving their work with United States funds and after a preliminary hearing had been taken to jail to await further examination. As they stood about in the alderman's court they looked the picture of despair and jabbered volubly among themselves as being haled into court. William J. Featherstone, commissioner of the bureau of fire and police at the ordnance camp, was the prosecutor in the case. It was made clear to the accused workmen through Gaeta, the interpreter, that unless they "came across" with the \$202.05, paid by the government for their carefare they would be taken before United States Commissioner Leroy J. Wolf, who would hold them until a Rochester man, who paid their fares with Uncle Sam's coin, could reach Harrisburg to testify against them. A matter of probably three weeks, during which time they would be compelled to remain in prison.

#### Call For Italian Cook

It developed that the men left their work because they were not furnished with food they liked. "No spaghetti, no macaroni, no Italian dish to make us strong so can work," they told the alderman, "and no Italian cook to prepare it." After they had thus justified their leaving camp and with loud protestations that they meant no disloyalty to the government, that their appetites only controlled their actions, the matter of raising the money to clear themselves confronted them.

Major William B. Gray over the telephone, told the alderman he did not wish to be severe with the men, but that he wanted them to understand they were engaged in serious business. They had taken United States money and had laid themselves open not only to prosecution on the charge of defrauding the government but of conspiracy as well, on a pretext that they did not like the food furnished them. Major Gray, furthermore, said they would

### SCIENTIFIC DOG POUND URGED UPON COUNTY

#### Humane Death of Unlicensed Animals Is Planned by S. P. C. A.

The promise of Commissioner Burnett to introduce in City Council some measure whereby cats may be muffed, scattered, decimated or otherwise done away with so that they will not be a nuisance and destroy all the war gardens to-day called out a plea from the Harrisburg Society for the Prevention of Cruelty to Animals upon the recent state dog law. Their attitude has the sanction of Mayor Keister who, though not personally attached to a pet dog, admits that he is a friend of cats, having two famous old tomcats who welcome him home from the arduous labors of mayoralty every day. The fact is therefore that although his Honor passed along the order for policemen to kill unlicensed dogs running loose he does not intend to make his policemen look foolish by enforcing it.

"No policeman is keen for shooting down a harmless dog in broad daylight," he said to-day in discussing the dilemma. "One tried it and the whole neighborhood revolted. On the other hand, the police station is flooded with protests and complaints about dogs and it seems that some measure should immediately be taken to protect the public."

#### Need of Pound

Both Mayor Keister and Mrs. A. Carson Stamm, who is a zealous member of the local S. P. C. A., agree that the state law ordering policemen and constables to execute dogs on sight is illogical because the county gets all the revenue at \$1 a head for killings and for licenses. The rates are \$1 for a male and \$2 for a female; although they could have been adjusted to \$2 and \$4. As things are now Harrisburg has no dogcatcher and no dog pound. Both of these are essential to solving the problem and the question has been who will put up the money.

"Mr. Bell, our president, and other officers of the society took this up with the state authorities," related Mrs. Stamm to-day, "and we were referred to those of the county. The county solicitor told us that the commissioners could pay out no funds for which the Legislature, and hence the county cannot help, although it receives all the revenue." Regarding this other officers of the society maintained that the act has a clause covering "other expenses," which might provide what is wanted.

#### Erge Painless Death

The necessary co-operation is emphasized by Mayor Keister and the S. P. C. A. The present situation is impossible. "Unless accompanied by an order a dog even with license tag has no right to run about. If equipped with license tag the policeman dare not shoot but he is directed, and this goes for a citizen to lure the dog home, feed him and advertise in the newspapers for the owner. If no owner shows up he is out of pocket and has a dog on his hands which he does not want. His only means of repay then is to kill the animal and turn it in to the county, receiving \$1 for that and another \$1 for keep."

"I believe I can speak for our society," offered Mrs. Stamm to-day, "and I suggest that the county hire our society to look after this entire matter. This is the only way to receive from licenses we can put up a substantial dog pound, hire dogcatchers and conduct this thing in a scientific manner. There will be no massing of dogs in the streets, no lying about of dead dogs, and we would be only too glad to volunteer our time and labor for the sake of the public welfare and to save dumb animals from suffering. This proposition is ready to be made and the society will not be the one blamed if some such project is not adopted very shortly."

### "Every Man Must Be Ready to Meet Any Emergency," Class in Gymnastics Is Told

"The reason why the Germans are standing still on the western front is because the French have locked up their men," said Captain Lumb to a class of fifty young men at the first annual Y. M. C. A. gymnasium men's supper last night in the assembly room of the Central Y. M. C. A. building. Captain Lumb was speaking on the subject, "Physical Preparedness." He urged all young men to participate in gymnastics work and be prepared for the tasks which they would be called upon to perform in this country. He declared, "must be ready to meet any emergency. The man who stands by and watches his fellow do the task at the critical moment never regains his self-confidence. Don't neglect your physical opportunities."

#### HE WANTED TO FIGHT FOR "UNCLE SAM"

Rejected on Account of Serious Stomach Trouble. Tonall Came to His Relief.

"I certainly was a disappointed man," says Irwin E. Mott, 124 1/2 North George street, York Pa., when the doctors rejected me from helping Uncle Sam. I was anxious to do my bit for my stomach was in such a condition that I was mused out. I have had a disordered stomach for the past two years. I would fall over two or three times a week. Doctors said my kidneys were not acting as they should and they claimed I had Toxic Poison. I tried Tonall and I have not felt so good for many a day as I do now. I have not had a spasm for the past ten days. I sleep, eat and am already gaining weight. My bowels are regular and my nervousness all gone. Tonall does me what no other medicine ever done. I think I could pass a satisfactory medical examination now.

### Hot Water Each Morning Puts Roses in Your Cheeks

To look one's best and feel one's best is to enjoy an inside bath each morning to flush from the system the previous day's waste, sour fermentations and poisonous toxins before it is absorbed into the blood. Just as coal, when it burns, leaves behind a certain amount of indigestible material in the form of ashes, so the food and drink taken each day leave in the alimentary organs a certain amount of indigestible material, which, if not eliminated, form toxins and poisons which are then sucked into the blood through the very ducts which are intended to suck in only nourishment to sustain the body.
