An Announcement by The Miller Rubber Co.

ONLY one cut of twenty-five applicants at the factory meets Miller standards. Uniform Tires can come in no other way than by rigid exactions—unwavering policies. Just so careful are we in choosing Miller Dealers. We want only those who reflect our ideals here. They must be capable of giving you exceptional service-just as Miller Tires are exceptional.

Uniform Tires---Geared-to-the-Road

Tires must vary as the men who build them wary. So uniform tires can be built by uniform men only, We solved this problem by training crack squads of tire builders. Each must meet exacting standards.

Here science keeps books on every man's efficiency. He is marked on every tire he builds But more than that he is penalized if ever one comes back. Under this searching system mistakes are few. Each man's personal efficiency is 96 per cent.

One Motorist in Fifty

Tires so uniform can never be produced where quantity output rules. Picked men are rare. If you multiply workmen you increase variables. So our production is necessarily limited. Only about one motorist in fifty can obtain Miller Tires this year.

If you want to be sure of securing Uniform Tires get a pair at once. Don't put it off. Our limited output compels us to limit a dealer's allotment each month.

And the tires this champion regiment builds-99 out of 100-wear the same under like conditions. Less than 1% ever needs adjustment.
