QUEER DISEASE KILLS CATTLE

Perry County Herd Suffers With Symptoms of Poisoning New to Veterinarians

Newport, Pa., May 13.—A queer disease, the classification of which is unknown, has caused within the past several days the death of four head of cattle belonging to H. K. Stephens and several other animals in the same herd are suffering from the malady. Two of the four animals suffered so badly that they had to be shot. Veterinarians have been unable to diagnose the affliction exactly.

The first supposition was that the animals had eaten swamp grass and had been poisoned. This has yet not been entirely disproved. The symptoms are those that result from hydrophobia.

ASK FRANCHISE FOR INDIAN MEN

Members of Order of Tipi Launch Movement to Bring Matter Before the Public

McCall's Ferry, Pa., May 13.—At the annual meeting of the Order of Tipi, held yesterday at the bungalow of J. Edward Vanderlost, near here, a movement was launched to extend the franchise to the Indian. At the same time a service flag was unfurled containing three disks, the emblem used by the Indian instead of stars, for three members of the order now in the service. The Order of Tipi is composed of York Indians and professional men, and the bungalow is a museum of Indian relics found in the hills adjacent to the Susquehanna river. Here the history and traits of the noble redman are studied and discussed, and many of the ceremonies long since forgotten by men in general are retold.

It is a fact that the redman does not possess the franchise, yet many of them have been educated and become good citizens. The members of the Order of Tipi have decided to launch the movement in such a manner that it will eventually come before the public in a general way. A number of new members were added to the order yesterday.
