Reference the Balkans occupied at the beginning of the war. Germany may organize Russia's millions and bring them to her own support, and thus stave off the defeat that now threatens. The Allies by sympathetic and understanding treatment may bring Russia back into the war on their side a year or so from now. Every one recognizes these two possibilities. A mistake with regard to Russia is the gravest mistake that can be made. Yet all evidence is that the situation, so far as this country and the Allies are concerned, is simply drifting. There is no accepted policy, as the difference of opinion over Japan showed.

Another deputation representing Semeneff, according to the same authority, reached a Pacific port recently. Among its members was the commander of the "Battalion of Death," whose arrival was recently recorded in the press. The purpose of this deputation, according to the reports here, is to plead for Japanese intervention in Siberia.

"Of all of the samples which were found not to be in accord with state laws not one was found to contain formaldehyde or boric acid. They were all found to have been watered, said the Commissioner. have this week been permitted to visit their homes for twenty-four hour periods.

Just what plans have been made for the division have not been made public, but men now safely "overthere" weer confidend when visiting home they would be called on to play a big part in the great battle that is to drive the barbarians back upon Berlin. The division is complete to the minutest detail, it was said, and the men, many of them veterans of the Mexican border campaign, are fit for whatever demands may be made upon them.

Transports Unharmed

The news that all the transports that have already sailed passed through the danger zone without mishap made happy to-day thousands of friends and relatives of the men who have left for the front. The successful crossing indicates the care the government is taking to transport its men and similar convoys, it is said, will be used to protect the soldiers yet to go.

Preparations for the sailing began about two months ago. A detail of engineers was sent to France to prepare the cantonment. After that the division began moving north for the port at which they were to embark. There was no effort made by the government to disguise the fact that the division was about to sail although the time was carefully guarded.

More to Follow

Not all the Harrisburg boys in the division have left the United States, it was learned, although a large number have. Letters telling of the journey are not expected for several weeks. Ordinarily it takes six weeks to get a letter back from France from the time the camps are closed to messages until a return boat brings back its mail.

Word was received last night that Col. Maurice E. Finney, former commander of the Eighth Regiment, National Guard of Pennsylvania, had arrived safely overseas, the message coming to Mrs. Finney, at her residence, 1407 North Front street. Col. Finney commands the 103d Headquarters Train and Military Police.
