American Devotion Eulogized by French

Paris.—The Liberte thus exalts the nobility of the American devotion to our cause: "Already the Americans have wetted with their blood our invaded soil. A recent communique gives an account of their losses. This was a surprise to many Frenchmen, who thought that much less of our allies were engaged in battle. Now they are fighting in the open. All the information from the front praise the valor and also the modesty and discipline of these youths, endowed with a particular beauty, the reflection of the ideal with which they are enraptured. "It is now our turn to die," James Wilson, the delegate of the workmen, said the other day to President Poincare. Admirable words that should be recorded in history!"

\$10,000,000 For Air Fleet Is Urged

Green Bay, Wis.—Alfred W. Lawson, the aeronautical expert, who in 1912 predicted that the country having the most efficient fighting air force would defeat and put out of existence its opponent, in an open letter to Congress asks for a \$10,000,000,000 appropriation for an air fleet.

"I understand," he writes, "that the War Department has asked for an appropriation of only approximately \$1,000,000,000. Congress should not hesitate a day in appropriating that amount and then must get ready to make larger appropriations for the greater air program which must, and no doubt will, be arranged by those in charge of military aeronautics and aircraft production in the near future. "The aircraft investigation is not a sufficient reason for stopping the construction of aircraft in this country altogether. Such a proceeding will certainly please the Kaiser. Imagine our boys 'over there' waiting for months for airplanes while we argue 'over here' as to whether the last appropriation was spent wisely or wastefully."

Porter Robinson and small son, Harold West Robinson, of Cleveland, Ohio, are stopping for a few days with Mr. and Mrs. Amos Martin Randall, of Market street.
