

SYRUPS FOR CANNING FRUITS Fruits may be satisfactorily canned without sugar, and those put up especially for young children might better have sugar omitted. might better have sugar omitted. The adult taste requires sweetened fruit and less sugar is required if the fruit is sweetened when canned. Sugar is added in syrup form when the product is canned and permeates it well during the process of steriliz-ing. It is more economical to can fruits with sugar rather than to add sugar when using. Send for a free canning namual which the National War Garden Commission, Washing-ton, will send you for a 2-cent stamp to cover postage. In directions given, various grades of syrup are mentioned. These are in the following proportions: This—One pint sugar to four parts water. Medium—One part sugar to two
