EXTRA GLASSES AS A PRECAUTION

Owing to the scarcity of optical glass and the increasing scarcity of help required for grinding lenses, I am advising all my patients to get an extra pair of glasses made while it is possible. You realize what it means to you if you should have to wait a week or longer for a lens and perhaps pay as much for one as you will pay now for two, It will prove a good investment to order a pair now. I will very gladly make up a pair at present prices and hold them for taken a number of orders in thi

KNOWN PLANS IN AIDING RUSSIA

May Announce in Few Days What Measures Will Be Taken With Japan

which have made the task of finding a way to extend aid to them a most discouraging one.

Aim Is to Baffle Hun

The Allies and the United States are not so anxious that the Russians should fight for the Allies as they are that Germany shall not obtain such domination over any great part of what was once the Russian empire that she can force the Russians to fight as individuals in the German army. The Allies and the United States do not want Russia to do their will. They want to assist her to resist the German will.

The President's word will be the pledge, the guarantee, which lies behind the military expedition which has been agreed upon as a necessary part of the scheme for carrying out the work of economic and industrial commissions which will be sent into Siberia and probably into European Russia as well.

State Coal Heads Find **Encouraging Conditions in** Conference on Output

Chief Button, of the State Department of Mines, and Frank Hall leputy, were at Pittsburgh last week n conference with the bituminous inspectors regarding the coal situations.

spectors regarding the coal situation.

The trade in the bituminous region is now unusually active. The men are receiving the highest wages ever paid to minters in the history of the coal industry and under this stimulus they are producing more coal per capita than ever before. The war has made decided inroads on their ranks in some districts and the allurement of still higher wages has taken many considered, howevers the prospect for a great production for the year is exceedingly bright.

Chief Button feels assured that although the number of workers has been reduced at least 15 per cent., the output will be increased at least 15 per cent., in which case the production for 1918 will be about 190,000,000 tons. Every effort is beinb made by the inspectors to see that properly prepared coal is sent to the market. The department is anxious to pre-

last winter, when coal of most in-ferior quality was supplied to the consumers, and the inspectors hav been instructed to give every pos-sible aid to the Federal Fuel Adminis-trator in the efforts being made the protect the public.
