

TIDE OF HUN INVASION NOW IS FAST EBBS

(Continued From Page 1.)

and they are holding Champvoisy to the northeast of the forest. In this region the Germans have the higher ground and have some advantage in the artillery duel.

North of the Marne the tide of German invasion is fast ebbing. The fact that a general retreat in this region is going on is not questioned, and the only question of moment remaining to be cleared up is the location of the position at which the enemy will turn at bay.

Since Saturday morning there have been important changes in the battle line between Soissons and Rheims. To-day it runs nearly directly east from Oulchy-le-Chateau to Fere-en-Tardenois, then crosses the Ourcq and continues eastward until it reaches the Dormans-Rheims road northwest of Rheims mountain.

Pushed Across Ourcq

It has been contended by military experts that the Germans might elect to stand on the line of the Ourcq river, from which their heavy cannon might dominate the Paris-Chalons railroad along the Marne. This idea now is proven erroneous. It appears that there is no defensive position south of the Vesle river to which the Germans can retire and organize their resistance to allied pressure. The only other defensive position seemingly possible is the one that follows the Aisne and Vesle from Soissons to Fismes and from that point follows the course of the Ardre river toward Rheims. Burning villages along the Aisne and Vesle from Soissons to Bazoches are reported and tend to confirm the impression that the Germans do not contemplate organized resistance south of that line.

Army Escapes Capture

There is every indication that the German high command has succeeded in extricating its forces from the trap sprung by General Foch. The resistance of the Germans for a week after the beginning of the allied counter offensive probably gave the Germans time to withdraw their heavier guns and a large proportion of their supplies from the salient. This resistance was very strong along the line south of Soissons as far as Oulchy-le-Ville and west and southwest of Rheims which were the vital sectors of the battle line.

The Advance of the Allies

The advance of the allies east of Oulchy-le-Chateau soon must compel the enemy to evacuate the line from the Ourcq river toward Soissons for a considerable distance. Nearer Rheims, however, the Germans seem to hold positions that will provide a pivot for their retreat toward the Vesle river.

Germans Badly Defeated

In this region the allies were this morning getting very close to the Ardre river, which forms a protection to the right flank of the enemy positions near Rheims.

As the situation now stands the Germans must be considered to have suffered a severe defeat north of the Marne, but it is not a Sedan.

While the Germans have been busy getting their forces back out of the bag between Soissons and Rheims, their forces further north again have been attacked by the British. Australian troops, attacking on each side of the Bray-Corbic road, east of Amiens and north of the Somme river. Two lines of German trenches over a two mile front were taken by the Australian troops, who also captured one hundred prisoners.

This operation is just to the north of Hamel and Villers-Bretonneux, where the Australians and Americans, early in July, won a local victory over the enemy. Further south is the line over which the French have more recently advanced to dominating positions along the Avre river.

More than half of the pocket between the Marne and Vesle rivers has been cleared of Germans and the allies are driving the enemy still farther north.

Important gains are being made by the French and Americans on the east and the French and British on the west. The German retirement which is covered by heavy rear guard actions, has been rapidly pressed northward the German resistance has become stiffer. The enemy also is making great use of its artillery on the heights north of Soissons and Rheims and is subjecting the sites of the pocket to an enfilading bombardment of great violence.

From west to east the allied line now runs from Oulchy-le-Chateau along the northern bank of the Ourcq to Fere, thence through Seray and Goussancourt to south of Ville de Bligny. North of Oulchy-le-Chateau and again in allied hands and the Germans apparently are preparing to fall back to the Vesle, if not to the Aisne, but the capture of prisoners here has been reported.

Allies Under Heavy Fire The Germans are using artillery and machine guns to stay the allies. The French and Americans who have advanced rapidly, are now northward the German resistance has become stiffer. The enemy also is making great use of its artillery on the heights north of Soissons and Rheims and is subjecting the sites of the pocket to an enfilading bombardment of great violence.

HOUSING PROBLEM IS COUNTRYWIDE

(Continued From First Page.)

and is now constructing more but it cannot keep up with its needs. Many of the large rubber companies in Ohio and elsewhere have built model towns for their workers and the list could be continued through nearly all of the important industries of the country.

Four Types of Operations Industrial housing operations are being handled in several different ways, among the most important being: The United States Government is constructing a large number of projects built by industrial corporations.

Projects built by citizens are being handled by Boards of Trade or Chambers of Commerce. Projects built by Real Estate and housing agencies are being handled by industrial housing is becoming more and more a part of the industrial project, and has gradually become the primary method of keeping the best labor and higher grade employees. As wages increase, the living requirements of labor rise and it is necessary to provide conditions under the conditions which at one time were considered "good enough for laborers."

PARK SYSTEMS FOR WANT FOR MANY

(Continued From First Page.)

Many Needed Improvements Must Wait Because City Has Not Appropriated Money to Cover Cost; Thousands Enjoy Natural System

While many thousands are taking advantage of our magnificent parks in this hot weather the fact remains that this department is so hampered with lack of funds that calamity stares it in the face. If Harrisburg does not make provision to take care of the parks with the same liberality it bestows upon other municipal bureaus.

REPORT PLANS FOR BIG OUTING

(Continued From First Page.)

Perry County Town to Give Band Concert at Reservoir Park

Newport, July 29.—Thursday will be "Newport Day" at Reservoir Park, Harrisburg. In the evening a free concert will be given in the park by the Newport Citizens' Band.

Hundreds of citizens from the town will go to Harrisburg on Thursday to take part in this affair, the biggest community affair, staged by the townpeople. The Newport Citizens' Band will be there throughout the afternoon and evening, the Newport Outing Club will turn out en masse, and many townspeople will be there.

Arrangements are being made largely by John H. Eby, executive representative in the last two Legislatures, and president of the two organizations which are working to make the event a success, the Newport Outing Club and the Newport Citizens' Band.

The plan is that of the Newport Outing Club, which is headed by President John S. Eby, includes the other officers: Dr. Erno A. Carl, vice president; L. W. Brimmer, secretary, and Hiram M. Keen, treasurer.

Newport will be practically closed tight during the afternoon. It will be the first half-day observed generally by the whole town. Every store in town, except one, is to-day displaying a card reading:

"This store will close at 12 o'clock noon on Thursday, August 1, 1918. Newport Day at Reservoir Park, Harrisburg. Concert by Citizens' Band and Newport Outing Club. Afternoon and evening. Everybody invited to be there to enjoy the half-day for Newport. Pack your lunch and meet us at the park. Help make this a real community picnic. The park has been granted us for the occasion."

Annually the Newport Outing Club has been having an outing at more distant points. This year, however, as a war measure and as a measure to intensify community spirit, the club proposed the plan of having the affair at Harrisburg where practically the whole town could attend. The date was selected after Commissioner of Parks Gross, of Harrisburg, had set the date for a free concert to be given by the Newport Citizens' Band at Harrisburg.

When it was doubtful if free concerts would be given at Harrisburg early this year because of financial shortages, the Newport Band, through the agency of its conductor, offered its services for a free concert.

This band, composed of thirty-five members, most of them under twenty-one years of age, was only organized about January, when the town could not play a note. Under the efficient leadership of Harry W. Kough, Jr., who will be in charge of Thursday's affair, the band has developed into a musical organization that reflects credit upon the town. The band gave a concert at the big Red Cross carnival at Landsburg on Saturday evening.

C. Harry Kain Made Captain in U. S. Army

C. Harry Kain, well-known architect of this city, received the congratulations of the Rotary Club at noon luncheon at the Hotel Hamilton Building to-day, on his appointment as a captain in the Quartermaster's Department of the United States Army. He will report to Washington on a secret tour of duty.
