Commission in anouncing a decision by Chairman Ainey in the complaint of John Weaver and other residents of Overbrook against the company. The case involved an extensive valuation and has been before the commission for months. The commission holds that service charges now in effect together with a condensation charge of 43 cents per 1,000 pounds will return sufficient revenue for seven per cent. return.

The value of the stam heating plant for rate making purposes was fixed at \$142,000 and this represents eighty-six per cent. of the company roperty. In an exhaustive study of the case it is declared that condensation will vary with seasons and that there will be a natural increase in properties served. The total opperating charges for the 1916-1917 period, exclusive of depreciation charges, \$73,066 and coal cost \$46,-

The commission finds that a seven per cent. rate of return would be afair return, just to company and patrons under present conditions, so that the company is entitled to earn over and above the cost of operation and maintenance, \$9,940 per annum. The rates under attack, it is calculated, would have yielded \$29,876 on the agreed base and are therefore held excessive.
