

GERMAN LEADER BEGS HIS AIDS TO ECONOMIZE MEN

Captured Enemy Order, Signed "Ludendorff," Admits Retreat Necessary

By Associated Press

With the British army in France, Aug. 14.—A captured enemy secret order signed "Ludendorff," lays stress on the necessity of economizing men. The order asserts that the two elements in the German strategy of the war are to "maintain everywhere our fighting strength and the spirit of offensive."

The document was issued late in June.

"It is essential," says the order, "that all commanders of whatever rank, to avoid the temptation to be imbued with the idea that the war cannot be won by a stubborn defense, but only by a further succession of victorious attacks, should be absolutely essential that we should avoid our old fault of attacking in too dense formations and we should reduce our casualties by every possible means."

Cannot Hold Lines

The order is frank in explaining that, because of the reduced German strength, it is now impossible to hold continuous trench lines and recommends instead the creation of centers of resistance.

The document warns commanders that should the enemy obtain a foothold within the German lines they

BIG FARM SHOW TO BE ENLARGED

Plans For Midwinter Exhibition Well Under Way In Many Sections

An elaborate display of small grain and allied farm products will be the added feature of the State Farm Products Show which will be held at Harrisburg on January 21, 22, 23 and 24, under the auspices of the State Department of Agriculture and allied state organizations.

In addition to the corn, fruit, potato, vegetable, wool, poultry, eggs and dairy products, the show will feature wheat, rye, oats, buckwheat, barley and soy beans, with displays of a peck each. The forage crop display will show the different types of hay consisting of alfalfa, timothy and the clovers.

The poultry and egg display will be much larger than last year and effort will be made to enlist greater interest in the industry and to bring about a much larger number of poultry keepers next year. Every section of the state is invited to send direct from their offices in order that the county displays may be kept together and the classification will be more complete.

The increased interest in the sheep industry throughout the state promises to make the wool end of the show one of the most important and an educational feature will be added by showing various types of sheep from which the clip or fleece has been taken. The sheep grower who have not exhibited at former shows. The new State Potato Growers Association is planning one of the largest displays of potatoes ever held in the state.

Concrete Ships Win Approval of United States

Atlantic City, Aug. 14.—The unqualified declaration that the United States Shipping board has approved the construction of concrete cargo carriers and proposes to build them upon a more extensive scale, was made yesterday by H. J. Brumer, chief of the bureau of concrete ship construction for the Emergency Fleet Corporation. Mr. Brumer said:

"Forty-two concrete ships provided for in our present program are only a beginning, for more are to be provided for as rapidly as practicable now that their practicability has been established to the complete satisfaction of the Emergency Corporation.

"Experience has demonstrated that the concrete ship is not only lighter but costs less than wooden vessels. The faith, our first reinforced concrete craft, cost little more than \$125 a ton, but her successors probably will cost as high as \$50 a ton. Wooden ships to-day cost the government from \$87 to \$122 a ton, depending on size and much higher. Steel ships cost \$125 a ton deadweight and upward. These figures are for hull alone."

Coinage of Cents Doubled in Year

New York, Aug. 14.—The announcement from Washington that 445,000,000 one-cent pieces were struck in the fiscal year 1918, lends interest to a compilation of the National City Bank's growing demand for these little coins which in 1918 output was the largest on record.

The bank's statement shows that the one-cent coinage in the United States from 1793 to the end of the fiscal year 1917 totaled 3,483,000,000 while the number issued in the last six years is, in round numbers, 1,000,000,000. The number of one-cent pieces coined never touched the 1,000,000,000 mark until the year 1907. The average from that time to 1916 was nearly 100,000,000 per year. In 1917, the number was 1,445,228,201 pieces. It is quite probable that out of the 3,483,000,000 pieces coined in 1918, by the government, not more than about 2,400,000,000 are now in existence, or at least in circulation.

Mother Burying One Son

Hears of Another's Death

OH CTRY, Pa., Aug. 14.—While Mrs. Jennie Willyoung, of Bullyhill, near Franklin, was attending the funeral yesterday afternoon of her son, George P. Willyoung, who died in Oklahoma from fever, a message was received by Mrs. Willyoung from the Department announcing that her son, Fred Boswick Willyoung, had been killed on the western battlefield in France, July 3.

Fred Willyoung left Franklin April 4, 1918, with selectives for Camp Lee, Virginia, and after being in training six weeks was sent to France. He is survived by his mother and one brother, Charles Willyoung, both of Bullyhill.

Short Leave Soldiers May Not Get Cut Fares

Washington, Aug. 14.—Plans to grant reduced railroad fares to soldiers on short leave from camps are under consideration, but the Railroad Administration is expected to insist on an inquiry that it seriously objects to the step at this time because of the difficulty of providing adequate transportation facilities for the increased travel.

At present only soldiers on furloughs travel at reduced rates.

CUTICURA HEALS INFLAMED SCALP

Itchy, Then Irr Sore Eruptions All Over Face and Head.

"My trouble began with an itchy scalp, and I scratched it causing it to become inflamed. Then it broke out in sore eruptions which spread all over my face and head. They were so itchy that I scratched, thus irritating them and causing bleeding. I got very little sleep, and my neck was a sight.

"Then I tried Cuticura Soap and Ointment, and I used about three-quarters of a box of Ointment with the Soap when I was healed." (Signed) Miss Miriam H. Ayton, 4122 N. 8th St., Philadelphia, Pa., March 22, 1918.

For every purpose of the toilet Cuticura Soap and Ointment are supreme.

Sample Each Free by Mail. Address post-card "Cuticura, Dept. H, Boston." Sold everywhere. Soap 5c. Ointment 5c and 10c. Talcum 5c.

I WAS WEAK AND NERVOUS

Would Get Numb and Dizzy

Says Mr. E. W. Ewell, 137 Balm Street, Harrisburg, Pa.: "I was just about all in, from nervous fagged me out. I was subject to dizzy spells, would get weak and nervous, could not sleep well nights. At times a numb feeling would creep over me, after which I would feel chilly.

"I ran the gamut of the usual treatments without result. I saw Sanpan advertised and decided to try it, and it worked wonders for me. In fact I feel perfect." Sanpan is being introduced at Keller's Drug Store, 405 Market Street, Harrisburg.

VISITING NURSE PRAISES TANLAC

Miss Mamie Rutter, herself benefited by Famous Tonic, Advises Its Use by All Who Are Run Down.

Miss Mamie Rutter, a visiting nurse whose home is 1233 North Second street, Harrisburg, Pa., says: "When I say that Tanlac should be taken by everyone who is suffering from any kind of trouble, or who is run down, I am speaking from experience and not from hearsay.

"For I myself was a sufferer from a most distressing form of stomach trouble.

"Tanlac was recommended to me and I can truthfully say that it gave almost instant relief. Since taking it my headaches have disappeared, the trouble in my stomach seems to have been corrected, for I no longer have that sourness or pain. Moreover, I found that Tanlac was a splendid blood purifier and a tonic for the whole system. In fact I found it more efficacious than any other remedy that I have ever used.

"Tanlac is now being introduced here at the George Gorgas Drug Store.

Removes Hairy Growths Without Pain or Bother

(Modes of Today)

It is not necessary to use a painful process to remove hairy growths, for with a little delicate handy you can keep the skin entirely free from these unsightly hairs.

The delicate handy you can use is made of a stiff paste with a little powder, delicate and water. Spread this on the hairy surface and in a few minutes the hair will have fallen out and the hairs are gone. To guard against disappointment, be careful to get real delatone.

Nervous Wreck—Now Live Wire

Makes Everybody Sit Up and Take Notice

One of our big league ballplayers had been going back for some time, but he wouldn't take any notice of me. He didn't get how hard he tried to get out of his old-time pep and ginger into the game, it was uphill work all the time. He was one of those honest, hard-working fellows and I finally got him to believe that his nerves went bad, he commenced to run down, could not eat or sleep and kept steadily slipping. Doctors and medicines were of no help.

"One of his many advisers said to him, "Why not try Phosphated Iron, everybody is boosting it."

Grasping at the last straw, the poor fellow took a try at it. The way he came back was an "eye opener," he was there in every department of the game, his nerves were like iron, he could hit the ball and was no time getting back to the three hundred mark, while his base running and fielding were great.

Discussing the matter with our reporter he said, "Would you believe it, I could feel the iron charging my blood with health and strength, while the way the Phosphates steadied and renewed my nerve force was almost too good to believe." Phosphated Iron took hold of me right from the start and sure did make a new man of me, and you can bet I carry a good supply on all my trips.

Doctors will tell you that you must have plenty of Iron and Phosphates in your system if you want your red blood and steady nerves of iron. Every one who is run down, nervous, tired and has that "all in" feeling should try Phosphated Iron and you will never be without it again.

Special Notice.—To insure physicians and patients receiving the genuine Phosphated Iron we have put up in capsules only, so do not allow dealers to substitute pills or tablets. Insist on the genuine in capsules only. For sale in Harrisburg by C. A. Gorgas, 16 North Second Street and Pennsylvania Railroad Station.

HERE'S YOUR OPPORTUNITY

Don't buy a new brass bed, chandelier, auto lamp, etc., until you have tried Gorgas' Nuss Mfg. Co. satisfactorily and reasonably we can repair and refinish your old ones.

The quality of our work assures you of the utmost satisfaction and the reasonableness of our prices assures you of a saving that is well worth while.

Phone us or drop us a line today and have our representative call tomorrow and give you an estimate on repairing, repolishing and refinishing work that you have to be done.

SCHWAB ORDERS FULL SPEED IN EASTERN YARDS

Demands That Atlantic Coast Equal Western Plants in Increase of Tonnage

Philadelphia, Aug. 14.—To speed up production of the eastern shipyards and to point out the necessity for putting every ounce of energy and enthusiasm into the great task of building a bridge of ships across the Atlantic, Charles M. Schwab, director general of the Emergency Fleet Corporation, called a meeting of shipbuilders in the east.

The meeting will be held at Mr. Schwab's office in this city next Monday and will be attended by the heads of all the large yards on the Atlantic coast. With his characteristic energy and enthusiasm, Mr. Schwab said yesterday:

"We want speed in the eastern yards just as we want in the western yards. They must increase production. They must put all their efforts into the task. I want them to speed up and that is why I am calling this meeting."

"I want to see the yards here, as well as those on the Great Lakes and Pacific coast. I want to speed up the yards in the east. I am making every effort to get production in those yards on a par with the western plants."

The Great Lakes Engineering Company, which is building ships for the Fleet corporation at its yards at Alpena, Mich., and Ecorse, Mich., is ninety days ahead of its program. It will launch six ships of 4,000 tons deadweight this month. A. C. Peasano, chairman of the company, was a caller at the Fleet corporation yesterday, making a report of progress and calling attention to the steel situation.

The steel situation is coming along very well, according to Mr. Schwab. While the yards on the Atlantic coast are fairly well supplied with steel, those on the Great Lakes and Pacific coast are not getting shipments fast enough to keep up with their advanced production schedules, according to the director general.

"The War Industries Board," continued Mr. Schwab, "is working with us in a most satisfactory manner. While we could use more steel, they are giving us all that we could expect at this time.

"There are to-day in the United States 450 yards that are turning out steel ships. We will absorb all of the resources of the country for the present. I have endeavored to balance the ship production with the steel production. The country will have a surplus of steel. The steel situation is coming along very well. While the yards on the Atlantic coast are fairly well supplied with steel, those on the Great Lakes and Pacific coast are not getting shipments fast enough to keep up with their advanced production schedules, according to the director general."

LATEST CORN FOE VERY EXPENSIVE

Zoologist Sanders Gives Information About the Corn Root Aphid

General complaints from some sections of the state of damage being done the corn by the corn root aphid have been reported to the Department of Agriculture within the past few weeks.

Rotation of crops is the only method of obtaining relief from the pest, according to Economic Zoologist J. G. Sanders. Professor Sanders says:

"We have had considerable complaint this season about the corn root aphid. This insect has an interesting life history. If the nests of the small brown ants, which are so abundant in cornfields infested with corn root aphids, be carefully examined during the winter, there will be found stored in the nest many small black aphid eggs. These ants move up and down according to the weather. In the winter, there will be found the aphid eggs in the nest. In the spring, the ants go to keep the eggs in unfrozen ground.

"In April and May with the appearance of smartweed and foxtail grasses, the aphid eggs hatch. The ants at once set in touch with the roots of these plants, and preparing a place for them, bring the aphids to the surface of the soil. The ants are transferred to the corn but should the field not be planted to corn the aphids will feed upon the smartweed grass or purslane.

"In May the second generation of aphids commence to appear both winged and wingless forms. This generation is the most numerous. The aphid females commence to give birth to live adults. These multiply very rapidly and in October the females commence to reproduce in eight days after birth.

"These are herded on the corn roots by the ants which milk them by stroking them with their antennae. The aphids respond to this gentle caressing by exuding a honey dew upon which the ants greedily feed.

"In late September and October the true males and females are produced which mate and later eggs are laid which the ants carefully store in the ground. From which aphids hatch the following spring.

"The only method of obtaining relief from this pest is to rotate crops.

FOUR FIRE COMPANIES TO ATTEND CONVENTION; FIND ACID-EATEN HOSE

Four local fire companies will participate in the events of the State Firemen's Convention at Lancaster, Pa. The companies which will take part in the parade. Each company will be accompanied by a band. The companies which will send delegations to the convention are the Royal, Allison and Camp Curtis. The decision to participate was announced at a meeting of the Harrisburg Firemen's Association last evening.

It was announced at the meeting that two new sections of hose belonging to the Mt. Pleasant company had been ampered with and acid was in the cause of the hose belonging to a Steelton fire company. The tampering was discovered some time ago, but no clue to the perpetrators has been discovered.

Complaint was made that no place had been made for the accommodation of the equipment of the Mt. Vernon and the equipment of the Fair houses were torn down in the Capitol Park extension plans. Representatives from Middletown and High-ville fire companies were at the meeting.

WILLIS WILL MAKE RACE AGAINST COX IN OHIO

Columbus, Ohio, Aug. 14.—For the third time in six years, Frank B. Willis, Republican of Delaware, and James M. Cox, Democrat, of Dayton, will oppose each other for the governorship at the November election in Ohio this year. This was decided at the state-wide primary election held yesterday. Willis an avowed dry, defeated Edwin Jones, of Jackson, and John H. Arnold, of Columbus, by 25,000 to 50,000 votes, and the victory was based on complete but unofficial returns from approximately half the precincts of the state. Cox and all Democratic state officers were renominated without opposition. Willis will meet again this fall, each with a victory to his credit. In 1914 Willis defeated Cox, then governor. In 1915 Cox defeated Willis, then governor.

PICNIC AT BOILING SPRINGS

New Cumberland, Pa., Aug. 14.—On Saturday the Sons and Daughters of the United Brethren held their picnic at Boiling Springs. They will hold a meeting on Thursday evening to make arrangements.

PERSONAL AND SOCIAL ITEMS OF TOWNS ON WEST SHORE

Edward McCaully, of Philadelphia, is a guest of Mr. and Mrs. Clarence Hoover at New Cumberland. Mr. and Mrs. E. E. Hutchinson of Gettysburg, are visiting the Rev. A. R. Hutchinson in Reno street, New Cumberland.

The B. G. Club of New Cumberland, who have been camping at Mt. Gretna, have returned home.

The Rev. and Mrs. A. R. Ayres, of New Cumberland, were at Carlisle yesterday.

Miss Sara Myers, of New Cumberland, is visiting friends in Philadelphia.

Miss Emma Heever, of Baltimore, is the guest of her sister, Mrs. Clifford Getter at New Cumberland.

William Water, of Newport News, Va. and Mrs. Kate Wagner, of Washington, D. C., are visiting their sisters, Mrs. Mary Bates and Miss Susan Bate, at Shiremanstown, there being a period of forty-nine years since the former saw his sisters here.

Mr. and Mrs. W. E. Meloy, of Mechanicsburg, and Mrs. William Brown and son, Albert, Donald and Kathryn Brown, of York, are visiting their sisters, Mrs. Kent Brown and son, Kenneth Brown, of Hunterstown, were entertained Sunday at the home of Mr. and Mrs. Isaac McKinly at Shiremanstown.

Dr. and Mrs. F. W. Ainsworth, Mrs. Norman Miller, of Cedar Run, when eight B. G. Scouts called with Miller, of Fort Pierce, Florida, were entertained at dinner on Sunday at the home of Mrs. Sara Strong at Shiremanstown.

Mrs. R. M. Crumpton has returned to her home at Seattle, Washington, after spending some time with her niece, Mrs. Blain A. Bower, at Shiremanstown.

Master Curtis Spangler, of Wells-ville, is spending some time with his grandparents, Mr. and Mrs. William Bentz at Shiremanstown.

Mr. and Mrs. William Corman, of Shiremanstown, spent Monday with Mr. and Mrs. Daniel Deckman at Milltown.

Mrs. James Glensner and son, James Jr., of Harrisburg, are spending some time with Mrs. John M. Rupp, Shiremanstown.

Mrs. Harry Spahr and Miss Alice Pfeiffer, of Philadelphia, are visiting Mrs. Spahr's parents and other relatives at Shiremanstown.

Mrs. Roy W. McMeiden, of Meriden, Conn., is the guest of Mrs. B. A. Bower, of Shiremanstown.

Mr. and Mrs. Howard Wolfe, of Annapolis, Md., and son, Howard Jr., of Lemoyne, spent Sunday with Mr. and Mrs. George Brubaker and other relatives at Shiremanstown.

HELD ON SUSPICION

Edwin Brown, aged 18, and Haywood Merton, aged 16, both colored, were arrested this morning on suspicion of attempting to steal an automobile which was standing in front of a residence in Emerald street.

SCHWAB ORDERS FULL SPEED IN EASTERN YARDS

Demands That Atlantic Coast Equal Western Plants in Increase of Tonnage

Philadelphia, Aug. 14.—To speed up production of the eastern shipyards and to point out the necessity for putting every ounce of energy and enthusiasm into the great task of building a bridge of ships across the Atlantic, Charles M. The ants at once set in touch with the roots of these plants, and preparing a place for them, bring the aphids to the surface of the soil. The ants are transferred to the corn but should the field not be planted to corn the aphids will feed upon the smartweed grass or purslane.

"In May the second generation of aphids commence to appear both winged and wingless forms. This generation is the most numerous. The aphid females commence to give birth to live adults. These multiply very rapidly and in October the females commence to reproduce in eight days after birth.

"These are herded on the corn roots by the ants which milk them by stroking them with their antennae. The aphids respond to this gentle caressing by exuding a honey dew upon which the ants greedily feed.

"In late September and October the true males and females are produced which mate and later eggs are laid which the ants carefully store in the ground. From which aphids hatch the following spring.

"The only method of obtaining relief from this pest is to rotate crops.

FOUR FIRE COMPANIES TO ATTEND CONVENTION; FIND ACID-EATEN HOSE

Four local fire companies will participate in the events of the State Firemen's Convention at Lancaster, Pa. The companies which will take part in the parade. Each company will be accompanied by a band. The companies which will send delegations to the convention are the Royal, Allison and Camp Curtis. The decision to participate was announced at a meeting of the Harrisburg Firemen's Association last evening.

It was announced at the meeting that two new sections of hose belonging to the Mt. Pleasant company had been ampered with and acid was in the cause of the hose belonging to a Steelton fire company. The tampering was discovered some time ago, but no clue to the perpetrators has been discovered.

Complaint was made that no place had been made for the accommodation of the equipment of the Mt. Vernon and the equipment of the Fair houses were torn down in the Capitol Park extension plans. Representatives from Middletown and High-ville fire companies were at the meeting.

WILLIS WILL MAKE RACE AGAINST COX IN OHIO

Columbus, Ohio, Aug. 14.—For the third time in six years, Frank B. Willis, Republican of Delaware, and James M. Cox, Democrat, of Dayton, will oppose each other for the governorship at the November election in Ohio this year. This was decided at the state-wide primary election held yesterday. Willis an avowed dry, defeated Edwin Jones, of Jackson, and John H. Arnold, of Columbus, by 25,000 to 50,000 votes, and the victory was based on complete but unofficial returns from approximately half the precincts of the state. Cox and all Democratic state officers were renominated without opposition. Willis will meet again this fall, each with a victory to his credit. In 1914 Willis defeated Cox, then governor. In 1915 Cox defeated Willis, then governor.
