EXPERTS BEGIN PROBE OF LIVING COST IN NATION

Washington, Aug. 20.—Country wide investigation of the cost of living was started today by the Bureau of Labor Statistics to obtain data for use in making wage adjustments. Six agents began the inquiry in Baltimore, calling on representative families in different parts of the city.

Information will be gathered from the families regarding their annual expenditures for food, clothing, housing, fuel, furniture and miscellaneous expenses. This information is expected to be useful, not only to the government but to the housewife as well, enabling her to know exactly what she is getting for her money.

From data already gathered by the bureau an increase of three per cent over the prices prevailing on June 15 is shown on twenty-two essential food articles a month later. The prices of several articles decreased. The fine cuts of fresh beef dropped one per cent, navy beans two per cent, and lamb and coffee less than five-tenths of one per cent.
