14 Canoists Drown When Boats Are Sunk

New York, Aug. 23.—Latest estimates indicate that sixteen persons are missing after the upsetting of a fleet of canoes in tow of a motorboat off Rockaway point on the Long Island shore. Vincent Russo, who was rescued from a buoy, said that he had been on the buoy for ten hours. He said that five other persons on the buoy with him had become exhausted and fell into the water. Four airplanes from Fort Tiltton were sent out yesterday to scout the water for missing canoes and survivors, while submarine chasers also hunted for survivors. Fifteen canoes were capsized when the leading craft in the tow turned turtle, according to reports which said thirty to fifty men and women were thrown into the choppy sea. The party, with persons in forty other canoes towed by three other motor launches, were on the way to an outing.

DON CARRUTHERS STILL IN CHINA

Harrisburg Boy With Y. M. C. A. Work Among Legation Guard in Peking, Writes

DONALD W. CARRUTHERS

Donald W. Carruthers, son of Mr. and Mrs. James Bruce Carruthers, 1350 State street, who is connected with the Army Y. M. C. A. work for Legation Guards in Peking, China, has written the following interesting account of conditions in that country:

"Dear Folks: This is the 14th of July and I imagine the French are celebrating the day of their founding of the republic—regardless whether it is Sunday or not. Two days ago there was an official Chinese holiday on the first anniversary of the restoration of the Republic as our friend Chang Hsiung would have preferred last year. He is still in a foreign legation as a refugee and the chances for his consulate seem to be quite good. In looking back over the past year it seems that the country is much more in need of help than at the same time last year even though there were attempts to restore the monarchy. To-day there are fighting within and without the country and worse than these—Chinese are betraying and selling their country each day. The forests and mines and natural resources and railroads that are available are being pledged in security for foreign loans to the neighboring country of Japan for better or for worse. It will mean that the country will be so involved at the time of the payment of the loans that the securities will have to be turned over to the creditors. Foreigners are not selling the country but the Chinese themselves and these are irresponsible leaders in power. I am quite sure it is not the will of the people and the Parliament (if there were any constituted popular opinion on the subject that these indignities should take place) but it seems that there is little to prevent such rank corruption. The opium combine Shanghai has but lately received new concessions to traffic in opium and the ban on opium has been severely disrupted. In the neighboring provinces there are many fields right at this minute in full bloom with the poppies. There has been a real sentiment against this use of opium for the past ten years and all thought that they were getting rid of it when lo and behold the bars are leg down once more and the cancerous sore is allowed to spread.

Germany at Last Admits Our Strength in France

Amsterdam, Aug. 23.—At last the German press has given up struggling against the truth. In a short notice which appears in virtually all the papers, the identical nature of which suggests official inspiration, the reluctant admission is made that Secretary Baker's figures regarding the strength of the American forces in France are about correct. One or two papers add the lame explanation that their former figures were based on the position prior to May, and that the really big shipments of men from America began since then.
