

TURKS, IN FIGHT FOR WAR SPOILS, ATTACK BULGARS

Germany Worried by Possibility of Hostilities Between Her Allies

Washington, Sept. 11.—Information reached here yesterday from a source usually reliable that Turkey has sent a large force to the border of Bulgaria, where trouble is brewing over divisions of territorial spoils of war between these two allies of Germany and Austria-Hungary.

The possibility of open conflict between Turkey and Bulgaria is watched here with great interest and is known to be causing serious misgivings at Berlin. The revolutionary spirit is rife in the Bulgarian army and among the civilian population, according to reports. The Bulgarians want more territory and are said to be determined to acquire all of Serbia and even a part of Austria. They already have obtained a strip of Northern Turkey, including one-half of the

city of Adrianople. Another cause for dissension is that when Bulgaria was awarded the Dobrudja in the Rumanian peace treaty dictated by Germany, Turkey demanded the cession of that part of its northern territory that previously had been given to Bulgaria as a reward for entering the war on the side of the Central Powers.

Supposed Trapper Was Shot by Lawbreakers in Woods

Huntington, Pa., Sept. 11.—Thomas Oshell, an aged trapper of Henderson township, and an octogenarian, was found lying in the woods by Caesar Blane, a farmer living nearby. He had a gunshot wound in the leg, and Game Warden John Bumgardner believes he was shot by turkey hunters, illegally operating on Stone Mountain. Oshell now is in the hospital.

GOODWIN LOSES ANOTHER WIFE

New York, Sept. 11.—Nat C. Goodwin, the popular and much-married and-divorced actor, was again divorced yesterday of a spouse when Supreme Court Justice Tompkins signed the final decree of divorce, separating Goodwin from his wife, Margaret Moreland Goodwin, who lacks many years of the actor's three-score summers. Goodwin recently starred in a play named "Why Marry."

PUBLICITY WILL HALT VIOLATION

Steps Taken by State Game Commission to Print the Names of Violators

First publication of the new "prosecution reports" of the State Game Commission has made a big stir and the "arrest lists," as they are termed, will henceforth be a part of the policy of publicity which the commissioners have adopted as a means of checking game law violations in Pennsylvania. They contain some shocks.

"We adopted this plan as a means of showing up the men who do what sportsmen have been doing for years. There will be no favorites played. The men arrested will be docketed and printed and made to serve as examples. Ink is a great thing to use when you have to enforce the law," remarked Dr. Joseph Kalbfus, the State Game Commission secretary. When the commission broached the plan there were few dissenters. By January 1 there may be more than the game officers have been told to make arrests without fear or favor and to report them.

Dr. Kalbfus says that he wants the sportsmen of the state, who pay hunters' licenses, and the public generally to know who is violating the law. He notes the work of the game protectors, the special deputies, the fish wardens and the state police, the latter figuring in many arrests. Under the game laws, says the introduction, the prosecutor gets half of the penalty in the case of an officer and under the fish code no one gets anything but the state.

The commission is also issuing a booklet on trapping quail for propagation purposes. It illustrates the Deckard-Crow-Albright trap and gives data for its use or that of any other trap. The perpetuation of quail call for what Dr. Kalbfus styles "some additional drastic steps" and he frankly admits that it means proper care of the birds during winter months. It is the intention supply protectors with the trap and have them trap the quail during the winter so that if the weather is as terrible as last winter the birds can be kept alive. The idea of having people trap quail and keep them over the winter, reporting to the game officers and turning out the birds in the spring, to be paid for caring for birds, is being seriously considered.

It will obtain better results than purchase of quail outside of the state. There are thousands of birds which can be taken and cared for by an organized effort and not only furnish sport in the next fall, but valuable aid as bug destroyers on farms during the summer.

There are going to be plenty of quail in some sections this fall, but it will be where sportsmen looked after the birds. The weather last winter all but wiped out the birds in some sections.

Splendid bass fishing is commencing to be reported to the State Fisheries Department from the large interior streams of the state, while bass have been taken in more than twenty streams where they have been planted in the last few years. In the Susquehanna system the catch of bass has been generally good and also reporting fair catches, a special effort to restore the bass in that part of Pennsylvania having been made.

The shipment of trout for stocking purposes the first week of the month will run high, it is believed. The last fifteen days of August saw distribution of thousands. More could be sent out if men could be obtained.

SUNDAY BAND CONCERT—Marietta, Pa., Sept. 11.—The Liberty Band of Marietta is arranging for a concert on Sunday evening, next, in Center Square at 8.15 o'clock. In case of inclement weather the concert will be held in Acris Theater.

STATE HARD HIT BY ARREST DRAFT

Engineers and Other Professional Men May Be Put Into Deferred Classes Now

Branches of the state government employing engineers and other professional men will make representations to the army authorities for some ruling regarding deferred classification for them so as not to disrupt the state service. In the last week or so heads of various departments have been discussing the matter and the State Service Commission request an early ruling from Washington.

In a number of instances, it will be pointed out, state engineers in the investigations and carrying out of directions have facilitated government of men and materials and also helped repair breaks in water and electric service.

Most of the engineers remaining in state service are within the new draft limits.

Pardon Board List—Thirty-two cases, five of them held over from June, have been listed for the meeting of the State Board of Pardons on September 18. In the twenty-seven new cases are three applications for commutation of death sentences and four in which it will be represented that the men are in prison. Since filing of these applications one man has died. Six applications for rehearings are also to be heard.

Repair Work Rushed—Owing to the heavy movement of army motor truck trains from western assembling points over state through highways the Pennsylvania Department is concentrating its repair and maintenance forces on the National and Lincoln highways. These roads which will be much used for military trains this winter are to be put into the best condition possible.

Visited Capitol—Among visitors to the Capitol were Ex-Senator James M. Campbell, Mercer and Joseph M. MacNeil.

Named to Scholarship—Miss Mabel E. Johnson, of Philadelphia, has been appointed to a scholarship in Philadelphia Textile school by Governor Brumbaugh.

Permits Issued—The State Water Supply Commission last night issued permits for James S. Shearer to repair a mill dam across Sherman's Creek in Wheatfield township, Perry county; Charles H. Hunt for a bridge over Little Conestoga creek in Manor township, Lancaster county; and the Norfolk Dredging Company for permission to dredge in Shamokin creek near Hamilton.

To Help Army—E. B. Dorset, the new director of markets of the Department of Agriculture, has sent letters to the quartermasters of various camps in vicinity of Pennsylvania making inquiries as to ways whereby the state can be of service in obtaining supplies of Pennsylvania farm produce for the military establishments. He will arrange to put farmers in communities specializing in various products into touch with the army authorities.

Want to Build—The State Armory Board has been called for a meeting on Tuesday to discuss the proposed construction of armory buildings on addition at Reading, Tyrone, Pittsburgh and Philadelphia. The latter is for cavalry and the Pittsburgh project for artillery. If the War Industries Board will approve the regulations for steel the state will go ahead.

Don't Know a Bargain—Highway Commissioner O'Neil to-day declined to readvertise for bids for construction of five miles of state highway in Heidelberg township, Berks county, on which the best price was \$122,000. The Berks County Commissioners asked that a new invitation be made for bids. Mr. O'Neil holds that the price, considering war conditions, is favorable, and that as the national government is paying \$10,000 a mile and the county is getting credit for which it paid for freeing the William Penn highway of toll roads between Reading and Harrisburg, its net share of the contract would be about \$51,000. The project has been given government approval and he stated that he thought work should go ahead as it is a main highway and post road.

Priority Ruling—The question of whether priority of exemption of a name shall not govern where there are two sets of nomination papers filed, will be asked of the Attorney General's Department by the Secretary of the Commonwealth. In four districts there are double nomination papers filed under the Fair Play name. At the Capitol it is stated that the priority appears to be held by signers favorable to Nicholas diDemmo and J. L. Levis, 3d Philadelphia; W. J. Brady and Alexander Colville, 10th Philadelphia; S. J. Perry and J. F. Snowden, 18th Philadelphia; Adam C. Schaeffer, First Schuylkill.

Mr. Glass Here—Representative Leopold C. Glass, of Philadelphia, was here to-day in connection with nomination matters.

General Stewart's Death—To-day was the first anniversary of the death of Adjutant General Thomas J. Stewart.

To Issue Ships—An order was made on the Section Railways Company by the Public Service Commission to-day for issuance of excess fare certificates.

Service Hearings—Complaints against the rates of the Schuylkill Railways Company, were heard by Public Service Commissioner John S. Rilling to-day from the boroughs of Ashland and Mahanoy City, similar attacks being made on the rates of the Chambersburg and Gettysburg system near Mont Alto. The respondent did not appear in the complaint against the Carlisle and Mt. Holly system's fare and service.

Airplanes in Vicinity; Hens Refuse to Lay—Dallas, Tex.—It takes an astute hen to differentiate between a high soaring airplane and a circling chicken hawk. That's why farmers in the vicinity of Dallas are petitioning the government to keep scouting planes from above the farms. For you know, a restive hen will not lay eggs if excited.

Arthur Whiting, a farmer, living in the vicinity of Dallas, was the first to notice that the proximity of airplanes was followed by an augmented decrease in the number of eggs produced by his hens. By observation Whiting determined that the nearness of planes caused the "hiddies" to scramble for their roosts, forgetting all about laying.

Whiting initiated the petition, which is being signed preparatory to dispatching it to Washington.

Whether egg or aviator production has the right of way will be determined when answer is received from

U.S. CONTROL OF UTILITIES NOT WAR NECESSITY

Auditor General Snyder Is Given Ovation at Opening of State Convention

Pottsville, Pa., Sept. 11.—Auditor General Snyder was the principal orator at the fifty-ninth session of the State Council, Junior Order American Mechanics, which opened yesterday. Mr. Snyder paid a glowing tribute to our form of government and declared Pennsylvania was the refuge of more seeking liberty than any other colony.

While disclaiming insidious criticism, the Auditor General declared amid loud applause that he did not approve of the policy of the federal government in taking over many of the public utilities, such as railroads, telegraph and telephone systems and interfering with the business affairs of other industries. He declared there should be no central power at Harrisburg or Washington that shall dictate how one's business, social affairs or family should be conducted.

He intimated that the personal rights of the people are gradually being flinched from them under the pretext that the control of some of the business concerns of the country is necessary. Judging from the applause of the 200 delegates his remarks met hearty favor.

Nominations of officers were made disclosing that H. H. Sinnaman, of Philadelphia, has no opposition for state counselor; neither has Charles Kauffman, of Philadelphia, for treasurer. M. G. Jenkins, Edwardsville, and Cyrus Weils, Wilkes-Barre, were nominated for state vice-councilor.

Pittsburgh, Harrisburg and Stroudsburg are competing for next year's convention.

Furniture Dealers to Close at 5 O'clock

At a meeting of the Harrisburg Furniture Dealers' Association, held last night at the Elks' Home, it was decided to close all stores operated by members of the association at 5 o'clock for five days a week during the winter months.

PREPARE FOR OPENING OF WHARTON SCHOOL

An enthusiastic meeting of students and alumni of the Harrisburg branch of the Wharton School of the University of Pennsylvania, was held last night in the offices of the bureau of accounts and statistics of the Public Service Commission, at which time plans for the opening of the 1918-19 term of the branch were discussed. Dr. Grayson, director of extension school work of the university, addressed the meeting.

B. G. Knight, assistant to Dr. Grayson, will arrive here next week to take charge of the registration of new pupils. C. J. Kelley was elected chairman of a committee of alumni and students to conduct a campaign for prospective students.

TELLS HOW TO GET BACK OLD TIME AMBITION

Discoverer instructs druggists everywhere not to take a cent of anyone's money unless Bio-feren doubles energy, vigor and nerve force in two weeks.

7 A DAY FOR 7 DAYS

Any man or woman who finds that they are going backward, are not as strong as they used to be, have lost confidence in their ability to accomplish things, are nervous, run-down should take two Bio-feren tablets after each meal and one at bedtime.

Seven a day for seven days. Then take one after each meal until the supply is exhausted.

Then if your nervousness is not gone, if you do not feel twice as good, if your sluggish disposition has not been changed to a vigorous one, take back the empty package and your money will be returned without comment.

No matter what excesses, worry, overwork—too much tobacco or alcohol—have weakened your body and wrecked your nerves, any druggist anywhere is authorized to refund your money on request. If Bio-feren, the mighty upbuilder of blood, muscle and brain does not do just what is claimed for it.

Note to Physicians: There is no secret about the formula of Bio-feren. It is printed on every package. Here it is: Lecithin; Calcium Glycero-phosphate; Iron Peptonate; Manganese Peptonate; Ext. Nux Vomica; Powdered Gentian; Phenolphthalein; Oleoresin Capsicum; Kola.

Keeps Teeth Clean and Gums Healthy

Specially indicated for treatment of Soft, Spongy and Bleeding Gums.

All Druggists and Toilet Counters.

DEMOCRATS USE WAR TO CLOUD GRAB AT CENSUS

Bill Partly Passed Would Wipe Out 100,000 Civil Service Appointments

Washington, Sept. 11.—Under the cover of war excitement and interest, the Democratic majorities in Congress are planning to put through the greatest attack upon the civil service law that has been made in years.

It is another demonstration of how "politics is adjourned" by every one except the Democrats in control of the government.

Protests presented against the pending census bill by the Civil Service Reform League to the Senate committee on census calls attention to the fact that the proposed legislation would throw open places of political patronage for thousands of

men who are to be employed almost immediately in taking the census of 1920. This bill very carefully provides that all the men to be so employed shall be subject only to such tests of their qualifications as may be prescribed by the director of census.

This would mean that the Democratic head of the census bureau would be empowered to provide only such tests as would determine whether a man to be employed was a good Democrat and had the endorsement of Democratic authorities.

In 1908 a bill similar to the present one was put through by the Republican spokesmen in Congress, and was promptly vetoed by President Roosevelt.

When an effort was made to pass the same measure after Mr. Taft had become President he defeated it by announcing that he, too, would veto it. Now it is up again, brought forward this time by the Democrats. It has already passed the House and preparations are under way to put it through the Senate.

There have been no intimations from the White House that President Wilson will follow the example of his two predecessors and veto the bill. Instead, it is calmly asserted by its sponsors that it will become a law if a majority in the Senate supports it. It is estimated that 100,000 persons will be employed throughout the country in the new census work.

Don't get caught in the LAST HOUR RUSH to register to-morrow. Register early.

NUXATED IRON

You Can Tell the Women with Fifty of Iron in the Blood... Beautiful Healthy Rosy Cheeks... Dr. Ferdinand King, New York Physician and Medical Author, says physicians should prescribe more organic iron—Nuxated Iron—for their patients—says a anemia—iron deficiency—is the greatest cause of the health, strength, vitality and beauty of the modern American Woman.—Sounds warning against use of metallic iron which may injure the teeth, corrode the stomach and in some cases thereby do more harm than good, advantage of only nuxated iron, taken three times per day after meals. It will increase the strength and endurance of weak, nervous, run-down folks in two weeks' time in many instances. Dispensed by all good druggists.

Understand This Now! Catarrh Can Be Relieved

But You Can't Rely on Sprays, Lotions and Salves—Get on the Right Treatment at Once.

The very fact that Catarrh is often considered to be nothing more than a bad head-cold or inflammation of the membranes of the nose and throat has caused many people to go through years of suffering who might have been fully restored to health had they realized that the supposed cold in the head was not a local trouble only, but that they had become infected with the germs of a complicated and dangerous disease.

It is true that Catarrh usually begins with a cold in the head, and this supposed cold may have been caused by infection through proximity to infected persons, in a closed street car or room, inhaling the germs when someone coughed or sneezed; but, however the infection occurs, the poisons which are taken into your system ultimately find their way into your blood and the supposed cold becomes a constitutional trouble that will affect every part of your body. The poisoned blood circulating through your system will carry these germs to the very source of your vitality.

Look out for these symptoms for there is no more annoying or dangerous disease than Catarrh. There's a continual discharge from the nostrils, buzzing in the ears that grows worse and worse, sometimes leading to deafness, scabs in the nostrils, headaches, dripping in the throat, constant hawking and spitting and in certain stages of the disease the odor from the breath is very offensive.

Catarrh is usually worse in winter because of over-heated rooms and offices, and because the low temperature prevents the little relief that healthy sweating will give. The poison vitiated air in stuffy rooms is breathed over and over—in fact, the daily habits of men and women in winter are faithful allies of this disease. As the blood circulates through the body, it carries Catarrh germs into the stomach, causing chronic dyspepsia; it affects the kidneys and bladder; it weakens the general health and causes loss of appetite. The sufferer feels depressed and half-sick most of the time, but the greatest danger lies in the fact that if the Catarrh is not checked, the lungs may become involved, terminating in Consumption, the most insidious of all diseases.

Don't expect to permanently cure Catarrh with sprays, lotions and salves, or medicated cigarette smoking. They give only temporary relief. S. S. S. is the best treatment for Catarrh, because it goes right into the blood and assists it in removing the Catarrh poison and at the same time builds up the entire system by its fine tonic effect. S. S. S. is a purely vegetable remedy and not injurious to the system, like mineral medicines are.

For the benefit of those afflicted with Catarrh or other blood diseases we maintain a medical department in charge of a specialist skilled immediately, get a bottle of S. S. S. from your druggist today, and write us fully about your case. He will give you careful study and advise the proper treatment for your individual case free of charge. Address: 415 Swift Laboratory, Atlanta, Ga.

THE GLOBE "Save Old Rubber" For the Red Cross THE GLOBE

Time to Select New Fall Clothes

Wartimes have not stunted, but rather brightened the designer's style ideas, so that we can say in all sincerity that the new Fall and Winter styles featured in

Fashion Park Clothes

(Sold exclusively by The Globe)

are by far the most beautiful—the most sensible—and the most practical garments for men and young men we've ever shown.

FASHION PARK CLOTHES are distinctively styled clothes—tailored with remarkable elegance—made to harmonize with your physical set-up and possess "that something different" no other clothes can acquire.

\$35 to \$60

YOUR NEW FALL HAT

If you're "choicy" as to style and quality, your new Fall Hat can best be chosen from our big line-up of Stetson's, Schobles, Young's and other famous makes.
