Fruit Stones and Pits Wanted For Gas Masks

Mechanicsburg, Pa., Sept. 18.—To save the lives and health of soldiers from German poison gas a certain form of carbon is necessary. The best form of carbon for this purpose is made from coconut shells, of which, at present, there is an acute shortage. The most satisfactory substitutes for coconut are peach stones, apricot pits, prune pits, plum pits, olive pits, date seeds, cherry pits, Brazil nut shells, shells of hickory nuts, walnuts and butternuts. It is of vital importance that a vigorous campaign for the collection of these fruit pits and nut shells be set in motion at once. Therefore, people of Mechanicsburg and vicinity are requested to help in this line of work. All pits and shells must be thoroughly dried, either in ovens or by the sun before they are sent in. The collection will be made under the direction of the Red Cross and instructions will be given later where to send all seeds and shells.
