## **AUTO CHANGED** METHODS IN WAR

SATURDAY EVENING.

and armament.

"To-day army transportation is a marvel of speed and dependability, and rubber has been largely responsible for the change. The fast motor truck of to-day could not have been developed on steel tires, or on tires of any known material other than rubber. Motor trucks carry supplies for soldiers, ammunition for their guns, and even the soldiers themselves, making the army of to-day more than ever dependent upon mechanical transportation for its effectiveness. The entente armies at the present time use in the neighborhood of \$0,000 to 100,000 motor trucks.

"The passenger automobiles with rubber tires make it possible for the commanders to oversee operations on twenty, thirty, fifty and even one hundred-mile fronts. They make it possible for wounded men to be quickly and carefully carried from the battlefield to the modern hospitals. Thousands of lives are weekly saved in this way. The motorcycle takes the place of the mounted dispatch bearer of other days. The total number of motor cars in use by the entente allies, exclusive of trucks, is approximately 100,000."

In conformity with the wishes of the government, the Packard, through its motor transport department, will deliver trucks, to essential industries only, co-operating to the government. Thousands of Packard with the war industries only, co-operating to the government. Thousands of Packard trucks are already in active service will be maintained on the thousands of Packard trucks now in use and on the 45,000 Packard passenger cars. The trucks to essential transportation. Both these factors work to relieve the present of the commanders to oversee operations of the care weekly saved in this way. The motorcycle takes the place of the mounted dispatch bearer of other days. The total number of motor cars in use by the entente allies, exclusive of trucks, to essential industries only, co-operating to the government. Thousands of Packard trucks are already necoming the control of the commanders to oversee operations of the control of the control of

# PACKARD CO. ON

How the automobile has revolutionized methods of warfare was received the pointed out by President Samule P. Colt of the United States Rubber Company, manufacturers of United States tires.

"In the days of the Civil War," said Colonel Colt, "transportation was slow and tedious, being mostly in the hands of the obstinate army mule and the profane skinner. Operations and maneuvers which are carried on daily in this war would have been impossible then because of the tardy distribution of supplies and armament.

"To-day army transportation is a marvel of speed and dependability, and rubber has been largely response."

The entire resources of the Packard man power, are to be devoted to war ard Motor Car Company, plant and man power, are to be devoted to war factory was made to dealers and the public to-day by Alvan Macauley, president and general manager of the company.

War essentials to which Packard now devotes itself exclusively are airplane engines, motor trucks, airplane and war tractors. The resources dedicated to the government of supplies and armament.

"To-day army transportation is a marvel of speed and dependability, and rubber has hear largely response."

# PUBLIC MUST TO DEDICATE

will be a treat for those interested in advertising.

Dr. Bagnell, who recently returned from the battle front in France will tell of his experiences and impressions. A chicken supper will be served and general good time socially will be the order of the evening. Each member will be permitted to bring a guest who is a buyer, seller or maker of advertising.

## New Class in Radio Buzzer Work to Start

## Fix Price and Demand Full Value When Buying an Auto

"Great energy is never more than result and just as often it contributes

result and just as often it contributes to failure," says the local dealer in Dort cars.

"I often think of this fact in observing the method and manner of shoppers in looking for an automobile. The prospect who dashes up and down the row, gathering armfulls of literature and earfulls of chatter, rying to mind-file the good and bad points of all the cars on the marker, is a common type. Not so common is the prospect who first fixes a price in his mind and then demands full value. But the dist type is often 'stung,' the second type seldom.

"The second type generally has in mind just this: 'How much can I get in strength, comfort and looks, for what I want to pay?' This nar-

gasoline, the sales demend for this model is very high. Many men whose business will not permit them to attend to their duties whout the aid of the motor car have found that Model 90 gives them the service they need and at the same time reduces the cost of operation considerably.

"With the closing of the summer months will come the call for more closed models. The Willys-Overland Company has prepared for this situation with the Model 90 Sedan.

"To the businessman to-day," said Mr. Hanson, "this is virtually an office on wheels." It gives the doctor, lawyer, merchant, and other business or professional men a means of conveyance closed against the cold winds, yet open for pleasant days of fall, spring or summer.

is impossible to distinguish old brass bed, chandelier, verware and other metal silverware and other metal goods from new when we re-finish them.

The price we charge for the quality of work we do leaves no excuse why your chandeliers, silverware, nickelware, etc., should not always look their

card and get our estimate on the refinishing of your table-ware, chandeliers, brass beds, automobile lamps, etc.
