WAR BEFORE POLITICS SAYS SEN. SPROUL

"Every patriotic effort should be devoted to making this Liberty Loan drive a tremendous success. Politics should not be allowed to interfere with the war effort. We are at a critical place in the world war and we must not relax our efforts. Those of us who are at home are enlisted in a mighty offensive, raising the means to establish our national arms and we must not let by-play divert us from our main objective. I am going to devote all of my time to this undertaking until we have gone over the top with all the money the government needs. So I will not talk politics. I will be plenty of time then to do our campaigning."

TELLS OF GAS USE

In regard to the charge made by the Harrisburg Gas Company in your paper of the 27th inst. I wish to state that the publication of a charge of maliciously tapping the service pipe supplying gas to premises 446 South Third street, Harrisburg, Pa., by Dr. Markley, is an insult, an unwarranted piece of malice, intended to injure reputation. The facts are that the gas company knew the tap was being tried to heat the water system at this apartment with gas service, and that W. D. Markley did not make the connection and did not know that the connection was made, as it was made; and as a matter of fact the experiment was a failure and gas from this connection could not be used in any other manner than for this experiment, and in fact none was used in any other manner. There was no malicious intent whatever, and as a matter of fact there was \$1.50 worth of gas consumed in all. W. D. Markley claims he is wrongly injured by the unwarranted publication of this matter in the local color given and accusations made by the gas company, and will at once institute an action for damages against this corporation.
