

BRITISH SHATTER HINDENBURG LINE IN FIERCE DRIVE

Cavalry Forces Follow "Whippet" Tanks and Armored Cars Through Fresnoy

With the American Army in the St. Quentin Sector, Thursday, Oct. 3.—British forces broke through the entire Hindenburg defense system in the neighborhood of Fresnoy today.

The entire German positions north and south of St. Quentin are gravely menaced. Infantry and masses of machine gunners poured through the break.

The enemy appears to be in full flight north of the gap. Allied patrols have penetrated farther into Cambrai, from which the Germans seem to be withdrawing.

There was desperate fighting. Fresh troops were poured into the battle. Prospect Hill, a strong enemy position, was taken by storm.

Many Germans were killed. Trenches were turned into shambles.

The Germans counterattacked against Gouy and Le Catelet. New British attacks were launched and desperate fighting still is in progress.

Prisoners from ten German divisions and forty-one battalions were captured to-day. Regiments from Flanders and Verdun were identified.

Least available air reports are to be effect that the advancing British troops are six thousand yards beyond the Beurevoir line. Machine gunners are said to have poured through the breach in the Hindenburg system aboard motor buses formerly operating in London. They followed the cavalry closely.

Airplane Inspectors to Try Test Flights Weekly

Washington, Oct. 4.—Government inspectors of airplanes and aeronautical engines, mechanics in charge of planes and motors in charge of engines hereafter will be required to make flights once a week.

An order made public yesterday by the airplane production division says the purpose is to give the ground forces a proper idea of their responsibilities by actual flying in the machines, they handle.

"I'd Like to Be There!"

YOU have said it—as you have looked as some vivid picture or read some stirring account of our boys fighting with American courage and self-sacrifice. If you cannot go out to them, you can fight for them, over here. Smash open the way for them with howitzers and big guns. Send them ammunition, tanks, airplanes, rifles, clothing, food. Help to keep them victorious.

You can lend as fearlessly, as unselfishly, as they fight. That is YOUR job as a part of our war machine.

OF COURSE you would "like to be there." They don't need you yet or you WOULD be there. But they need guns and shells, every hour they remain on the road to Berlin.

Absolutely the next best thing to going over is to
