EPIDEMIC HITS YARDS AT ENOLA

Shopworkers and Trainmen Brought From Other Places to Help in Emergency

increasing rapidly among the emoyes of the Dennsylvania Railroad Company and the officials in the local yard, have been busy securing help to keep the shops and train movement going. Many men have been brought here from Altoona, Baltimore, York, Marietta and a number from Pittsburgh, to assist the officials 'n manning the trains and to work in the car repair shops, which are badly crippled by the epidemic. Many of the victims of the disease are in a serious condition.

dispatch from Zurich says. It is added
that the more rapidly the abdication
is brought about the better for the
country.

For Itching Torture

There is one remedy that seldom fails to stop itching torture and relieve skin irritation and that makes the skin soft, clear and heaithy.

Any druggist can supply you with zemo, which generally overcomes all skin diseases. Acne, eczema, itch, pimples, rashes, blackheads in most cases give way to zemo. Frequently, minor blemishes disappear overnight. Itching usually stops instantly. Zemo is a safe, antiseptic liquid, clean, casy to use and dependable. It costs only 35c, an extra large bottle, \$1.00. It will not stain, is not greasy or sticky and is positively safe for tender, sensitive skins."

SPANISH INFLUENZA

What It Is and How It Should Be Treated

This disease, authorities now agree, is simply the old-fashioned grip that was epidemic in 1889-90. Then it came from Russia by way of France and was given the French name of La Grippe. This time it comes by way of

Spain. Spanish influenza, which appeared in Spain in May, has swept over the world in numerous epidemics as far back as history runs. Hippocrates refers to an epidemic in 412 B. C., which is regarded by many to have been influenza. Every century has had its attacks. Beginning with 1831, this country has had five epidemics, the last in 1889-90.

THE SYMPTOMS

Grip, or influenza, as it is now called, usually begins with a chill, followed by achfeverishness and some times nausea and dizziness, and a general feeling of weakness and depression. The temperature is from 100 to 104,
and the fever usually lasts from three to five days. The
germs attack the mucous
membrane, or lining of the air
passages — nose, throat and
bronchial tubes—there is usually a hard cough, especially
bad at night; oftentimes a
sore throat or tonsilitis, and
frequently all the appearances
of a severe head cold. imes nausea and

THE TREATMENT Go to bed at the first sympoms—take a purgative, eat

Go to bed at the list symptoms—take a (purgative, eat plenty of nourishing food, remain perfectly quiet and don't worry. Nature herself is the only "cure" for influenza and will throw off the attack if only you conserve your strength. A little quinine, aspirin or Dover's Powders may be given by the physician's directions to allay the aching. Always call a doctor, since the chief danger of grip is in its weakening effect on the system, which allows complications to develop. These are chiefly pneumonia and bronchitis, sometimes inflammation of the middle ear, or heart affections. For these reasons, it is very important that the patient remain in bed until his strength returns—stay in bed patient remain in bed until his strength returns—stay in bed at least two days or more after the fever has left you, or, if you are over 50 or not strong, stay in bed four days or more, necording to the severity of the attack. EXTERNAL APPLICATIONS

EXTERNAL APPLICATIONS

In order to stimulate the liming of the air passages to throw off the grip germs, to aid in loosening the phlegm and keeping the air passages open, thus making the breathing easier, Vick's VapoRub will be found effective. Hot, wet towels should be applied over the throat, chest and back between the shoulder blades to open the pores. Then VapoRub should be rubbed in over the parts until the skin is red, spread on thickly and covered with two thicknesses of hot flannel cloths. Leave the clothing loose around the neck, as the heat of the body liberates the ingredients in the form of vapors. These vapors, inhaled with each breath, carry the medication directly to the parts affected. At the same time, VapoRub is ab-

NO OCCASION FOR PANIC

There is no occasion for panic—influenza or grip has a very low percentage of fatalities—not over one death out of every four hundred cases, according to the N. C. Board of Health. The chief danger lies in complications Board of Health. The chief danger lies in complications arising, attacking principally patients in a run-down condition—those who don't go to bed soon enough, or those who get up too early.

HOW TO AVOID THE DISEASE

Evidence seems to prove that this is a 'germ disease, spread principally by human

spread principally by human contact chiefly through cough-

ing, sneezing or spitting. So avoid persons having colds, which means avoiding crowds —common drinking cups, roll-er towels, etc. Keep up your bodily strength by plenty of exercise in the open air, and good food. KEEP FREE FROM COLDS Above all, avoid colds, as colds irritate the lining of the air passages and render them much better breeding places

much better breeding places for the germs.
Use Vick's VapoRub at the very first sign of a cold. For a head cold, melt a little VapoRub in a spoon and inhale the vapors, or, better still, use VapoRub in a benzoin steam kettle. If this is not available, use an ordinary teakettle. Fill halfful of boiling water, put in half a teaspoon of VapoRub from time to time—keep the kettle just slowly boiling and inhale the steam arising. NOTE-Vick's VapoRub is

NOTE—Vick's VapoRub is the discovery of a North Carolina druggist, who found how to combine, in salve form, Menthol and Camphor with such volattle oils as Eucalyptus, Thyme, Cubebs, etc., so that when the salve is applied to the body heat, these ingredients are liberated in the form of vapors. VapoRub can be had in three sizes at all druggists. While comparatively new in certain parts of the North, it is the standard home remedy in the South and West for all forms of cold troubles—over six million jars were sold last year. VapoRub is particularly recommended particularly recommended children's croup or colds, as it is externally applied and can, therefore, be used freely and often without the slightest harmful effects.
