without possessing the confi-dence of a majority of the reich-stag." The responsibility of the chancellor of the empire to the representation.of the people is being legally developed and safeguarded. The first act of the new government has been to lay before the reichstag a bill to alter the constitution of the em-pire so that the consent of the representation of the people is required for decisions on war and peace. The permanence of the new system is, however, guaranteed not only by constitutional safe guards, but also by the un-shakable determination of the German people, whose vast ma-jority stands behind these re-fore continuare. The question of the Presi-dent—with whom he and the governments associated against Germany are dealing—is there-fore answered in a clear, une-quivocal manner by the state-ment that the offer of peace and an armistice has come from a government which, free from any arbitrary influence, is sup-ported by the approval of an edeman people. By Associated Press By Associated Press Parks, Oct. 23.—The rapidity of the British drive in Flanders and northern France has caused the Germans to realize that the Allied forces are approaching the Fatherland at a rate that, if not checked, might before long find their long-range guns pitching shells across the Rhine. There-fore the enemy is pulling himself together with a view to delaying to the utmost the Allied advance. The civil population of Flan-ders continues to be liberated at the rate of tens of thousands daily, now that the Germans have ceased to drive out the civilian occupants of the places they vacuate. Three of the state normal schools, West Chester, Indiana and Mansheld, have opened classes. It is expected that this number will be increased within the next ten days. Major W. G. Murdock, the chief draft officer, has issued a notice to members of local boards that they may suspend mailing of question-naires if in their opinion the mail-ing would spread influenza. Major Murdock has also cautioned boards to see that records are kept where registrants have died from influenza or complications during the epidemic and also to see that proper classifi-cation is given to registrants whose status may have been changed by deaths of dependants or by deaths of persons whose demise entails colli-sations upon men of draft ase. A number of local boards have telegraphed that they have been un-able to proceed with classifications owing to the influenza being engage-din caring for sick people in their districts.
