Churches to Open With Prayer Services Tonight

Virtually every church in the city will have prayer services this evening as a result of the lifting of the closing ban due to the influenza epidemic. These services will be the first regular public meetings of a religious nature to be held for the past five weeks.

Religious workers throughout the city have made preparations to undertake their work again with renewed energy after the period of the quarantine. Church societies and auxiliaries are planning to do more than their usual share of co-operating in religious work.

In connection with such plans, church societies, and especially young people's societies in the city are laying their plans and making preparations for work during the winter months to come. It is thought that the closing of the churches has brought church workers to realize more than ever of the importance of such plans for the coming months.

It is generally expected that the services throughout the city to-night will have large congregations in attendance.

THE SORE THROAT OF SPANISH INFLUENZA

One of the frequent complications of Spanish influenza is sore throat. It is important the sore throat be given prompt attention and relieved.

The throat is the gateway to the body. The air we breathe, the food we eat and the water we drink all pass through it. It is the great breeding ground for germs and this is especially true when it is sore or inflamed. If it is kept clean, disease germs have small chance to propagate and do their deadly work. Authorities agree Spanish influenza is a germ disease and that preventive measures should be taken. They advise the use of an effective gargle to keep the throat clean and healthy. For this purpose Tonsilne, The National Sore Throat Remedy, is ideal. It is also used as a spray and taken pure.

The wonderful increase in the sale of Tonsilne during the last few weeks shows that many thousands of families are making extra use of Tonsilne during this epidemic to quickly relieve the often accompanying sore throat and as a preventive measure.

Don't wait until you have influenza and sore throats in the house but get your bottle of Tonsilne from your druggist now for use as a preventive gargle and also to be ready to relieve sore throat upon its first appearance.

For more than 25 years the sale of Tonsilne has steadily and rapidly increased. The favor shown it by American people gives it the right to the title, The National Sore Throat Remedy.

WASTE OF SUGAR

THE following bulletin was among the most forceful and effective bits of conservation propaganda at the New York Food Show last month. It was put out by the National Sugar Refining Company of New Jersey:

"Save the waste!"

"One hundred million cups coffee used daily in United States.

"Savory million cups tea used daily in United States.

"One hundred and seventy million cups tea and coffee.

"If even an average of half a teaspoonful of sugar per cup is left undissolved at the bottom of cups of tea and coffee the waste would be 1,700,000 pounds of sugar daily.

"Stir your sugar until it dissolves. It's estimated that one-third to one-half of all sugars used in homes is used in tea and coffee. Think it over—how is it in your home? Isn't there a chance for saving?"
