Babe Ruth, Red Sox star, championed the cause of a number of women and squelched a group of rowdies who were annoying them at a local dance in Meredith, N. H., Saturday night. Ruth was present with Mrs. Ruth. The baseball giant bided his time, waiting for someone, in authority to halt the rough tactics, but when no one did, he acted. A short, snappy talk about "throwing them through the door" caused them to quiet down and leave the gathering.

HOUSE APPROVES NAVAL PROGRAM

Votes 194 to 142 Favoring New Three-Year Building Schedule

Washington, Feb. 12.—Administration leaders in the House have won their fight for a declaration by Congress of a policy of naval expansion unless limitation of world armament is agreed upon at the peace conference. After a long debate yesterday, the House voted 194 to 142 to approve the new three-year building program of ten battleships and ten scout cruisers and immediately afterwards adopted the entire naval appropriation bill.

The vote on the adoption of the bill was 281 to 50. As finally approved the measure carries a total of \$721,000,000 for the naval establishment during the next fiscal year, including \$179,000,000 for the unfinished part of the first three-year program adopted in 1915.

During the day the House adopted by a vote of 205 to 148 a resolution of the rules committee making the naval expansion policy legislation in order, thus overcoming a parliamentary advantage gained yesterday by Republican Leader Mann, whose points of order against the program had been sustained by Representative Garret, of Tennessee, Democrat, who was temporarily presiding.

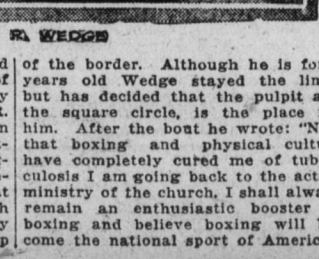

Representative Moore, of Pennsylvania, said the question to be decided was not whether the House was for or against a large navy, but whether it was for or against the people, who had to pay the bills, while Representative Johnson, of South Dakota, asserted that the time had come for Congress to adopt another declaration of independence and free itself from the mastery of the President.

NATIONS SOCIETY MAKES PROGRESS, SAYS PREMIER

Lloyd George Expects That Report Will Be Issued Soon

London, Feb. 12.—Progress on the formation of the Society of Nations was very satisfactory, Premier Lloyd George said in the House of Commons in discussing the work of the peace conference. He said he hoped that a report would be issued soon by the commission appointed to consider responsibility for the war and enemy outrages.

The Premier, in answer to a question, said that the British representatives, like the others, would sign the treaty of peace provisionally and that the treaty would be presented to Parliament for ratification. If the House of Commons chose to repudiate it, the House was all powerful.

The peace commission on indemnities, the Premier said he hoped, would issue its report soon. The Premier declared that the conference had made progress beyond the most sanguine anticipations and that it was approaching an agreement on most questions. It would be a misfortune, he added, if the peace conference deliberations were discussed in any parliaments before they were concluded.

Coal Mechanically Screened THE modern way to load and screen coal is by machinery. Coal is hoisted to the screens by electric power, after which the coal travels over a large screen to remove dirt and goes into our wagons ready for delivery. The old way for screening coal required the drivers to shovel coal by hand into a screen and afterwards throw the rescreened coal into his wagon. Hard work. Mechanically screening and loading coal requires less labor, therefore our men are better satisfied. Because of this we are enabled to secure better drivers.
