

FARM WORK FOR DISABLED YANKS

Men Are Being Taught to Operate Modern Tractors

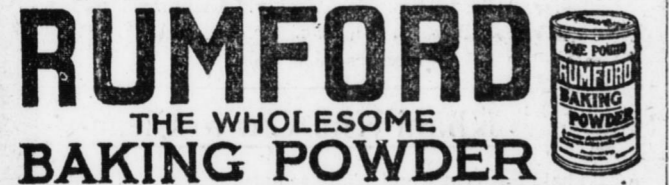

Washington, Feb. 14.—Labor is the great problem on the farm at the present time. War conditions and abnormal wages in the various lines of industry have demoralized farm help to such an extent that it is exceedingly difficult to get assistance requisite to carry on operations.

fore injury were farm boys. With this background of agricultural knowledge these men are being taught to operate modern tractors which do the work of many teams and men. They are being taught operation, care and up-keep of motor trucks and other gas engines. They are being given a general course in looking after all machinery used on modern farms, and indications are that the supply of these specially trained men will not begin to equal the demand. Farm hands who before the war could not hope to make more than \$25 or \$30, a month as laborers, can by becoming proficient as farm mechanics, qualify for positions paying from \$100 to \$125 per month with steady employment the year around.

TOO MUCH ADVENTURE

George Gilbert, aged 15, who appeared in the city a few days ago with a story of a life replete with adventure on the rolling plains and at the Mexican border, and who made men appear to be adopted and educated, was sent out of the city by military police last night, when they decided he had stayed in one place long enough. He says he is on his way to Denver, Col.
