What Critics Say of Negro Song and Music

"The musical art of the negro should be welcomed, encouraged and cultivated in this country for the great things that it is. America has produced no other music she would have made a significant contribution to the art of the world."

"In the presence of many well-known musicians and representatives from the New York musical press, unbounded enthusiasm was aroused when the orchestra struck up the strains of the fascinating rhythms of 'Swing Along.' Mr. Cook's work adds a new territory to the musical geography. A comparison with the work of another man, who has done a similar service to his race, becomes obvious when we look at Mr. Cook's masterpiece, his 'Exhortation.' These familiar with the peasant songs, the songs of the great Russian, Moussorgsky, will realize the striking parallel that exists, although in so different manner. What Moussorgsky has done for Russia, in faithfully noting the folk music, the Russian peasant—its orphans, its lay priests, its mothers and children, has done for America, in faithfully noting the folk music, the negro people. He not only has performed a service to his race, but he has enriched the entire musical world."

"After profound study of the subject and deep research, I have come to the conclusion that the negro melodies are the Cradle of American music. The Negro is the real inspiration of the American composers."—Giacomo Minkowski.

"The negro in this country has a message—a message that sings the struggle of a race from darkness into light. An unexpected force for the better understanding between whites and blacks has been liberated in this conscious admission of the negro into our musical life. If anything can bring harmony from the present clashing of the two races during this difficult period of problem, it might well be the peace giver of a larger democracy of the works of Mr. Cook, one involuntarily recalls Shakespeare's words: 'This above all, to thine own self be true. It is truth by his race that stamps Mr. Cook as another of the pioneers in the artistic efforts of the negro, lifting his work beyond an expression of musical talent alone, and making it prophetic of a larger democracy of the negro people in music.'—Natalie Curtis.

"Interest remains unabated in these folk-songs. There is no danger that the songs will be lost. No race has given a more varied and varied variety of emotions by means of songs. A folk-song is not a 'popular' song, but a song of the folk; not only the song admired by the people, but in a strict sense a song created by the people. Folk-songs are born, not made."—H. Edward Krehbiel.

And so, by fateful chance, the negro folk-song stands today not simply as the sole American music, but as the most beautifully expressive of human experiences born on this side of the seas."—Dr. W. E. B. Du Bois.
