Why Do You Wear Glasses?

You answer:—To see better, of course. All persons wearing glasses do not see better with them than without, but properly fitted glasses will relieve eye strain and remove the cause of much headache and nerve trouble for people who have been taking medicine for years and never suspected that their eyes were the cause of their suffering.

Simple Way to Have Beautifully Wavy Hair

Lustrous, fluffy, wavy hair plays an important part in the scheme of beauty. A heated iron should not be used to give the desired wavy effect, for it destroys the life, lustre and fluffiness of the hair. It is far better to use plain liquid silmerine, which curls the hair more effectually, more lastingly, and at the same time keeps it beautifully soft, light and glossy. It is beneficial instead of harmful, and it is such a simple thing to apply the liquid before resting, using a clean tooth brush for the purpose and drawing this down the hair from root to tip. Very different from the treasome fussy, odorious curling iron method.
