## **NEW PLAN HEARD** ON SALARIES

**Suggested That Counties Have** Boards to Fix the Pay of **Teachers Hereafter** 

Legislators and teachers who have been coming in from all sections of the state to discuss the proposition for using the Woodruff minimum salaries for rural teachers. As far as the teachers are getting well in hand, but the smaller districts present a problem.

The idea suggested is for a teachers sare getting well in hand, but the smaller districts present a problem.

The idea suggested is for a teachers sare yetting well in hand, but the smaller districts present a problem. The idea suggested is for a teacher's slary board for counties to have authority to adjust salaries in third and fourth class districts. This board is suggested to consist of three citizens, who would be selected by the governor or superintendent of public instruction, men of affairs and knowledge of local conditions who would serve without pay and fix the sum to be paid. In this way townships which have the same resources and which have different sharly lists would be required to give the teachers a better deal. The state would pay fifty per cent, for instance, and the school directors be obliged to case the hording of the teachers are better deal. The state would pay affity per cent, for instance, and the school directors be obliged to raise the cherhalf of the salary. The more people have gone into the problem he more they have been impressed with will even up conditions in listricts in the same county.

The teachers coming here have been working for months on the matter and mass of data showing just how directors handle the finances to the deriment of the educators has been presared. In all probability a determined ffort will be made to have the Palme have the problem have the palme the finances to the decriment of the educators has been presared. In all probability a determined ffort will be made to have the Palme have the palme
