ESTIMATES TO ELIMINATE FIRE HAZARDS SOUGHT

Board Is Undecided as to Changes Until Cost Is Determined

As soon as estimates of the costs of changes to the Camp Curtin school building addition to reduce fire hazards, are submitted the city school board will again inspect the structure and authorize alterations, it was decided at the regular meeting yesterday afternoon. Director Harry A. Boyer, Mr. East, architect for the addition and Christian Nauss, superintendent of buildings for the district, reported to the board yesterday, that the board was not ready to accept any plan until the probable cost of the alterations were determined. The motion by Director John F. Dapp, to have H. W. Foster, of New York, one of the three experts called here before, to accompany the board on its inspection trip through the building, was not approved. It is likely the plans for changes to the building will be discussed again at the next meeting in April 22.—Among the directors of the board recommending the use of the Fager building for a continuation school, and the abandonment of the present building, is "Posters" street, which was formerly a private dwelling house. The Red Cross has requested the board to either sell or lease the building to the Harrisburg Chapter, but the directors reported that conditions at the present continuation school necessitated removal to better quarters and that the Fager building was the only one which would be available at a reasonable cost.

Upon the recommendation of Professor Walter E. Severance, principal of the Central High school, submitted by Superintendent E. E. Downes, it was decided to hold the commencement exercises for that school in the evening instead of the morning, as had been the custom for years.

I certainly do not see the work, heats our seven-room house very easy. I could scarcely believe that when they told me it would heat as well upstairs as on the first floor, but the offer that they gave convinced me to give them a trial—and that is, if it did not give satisfaction, they would replace the old furnace and most any kind of could operate. You can burn ever. They are very easy to operate. It takes less coal and less work; gas or smoky rooms. It takes live in. Anyone wishing to see it can do so by calling at my home.
