The marriage records of the church, which have been carefully preserved to the present, show a minute of the wedding and an outline of how it was cunningly camouflaged. The fee was left with "Father" Glessner in an envelope in which the four coins were wrapped separately in paper, giving the impression that they were four silver dollars. When the wedding custom opened after the departure of the couple, the four copper coins were found, and these went to the wife of the minister, as was the custom with all the wedding fees he received.

TISSUE BUILDING.—Tissue is the doctor's name for body cells. It is to our bodies what coal is to an engine. Every day we burn up a certain amount of tissue. Therefore new tissue must be built to take the place of the lost fuel. The food we eat makes this new tissue and in a healthy person gives enough fuel to replace the loss. People get thin and "run down" because they do not get enough nourishment from their food to supply the needed fuel. When the weakened system does not do its duty you must have a "tissue builder." Father John's Medicine is a real tissue builder because it actually makes new flesh and tissue. When you take Father John's Medicine, the actual food elements of which it is composed give you new strength, and enable the organs of the body to resume their work. THOUSANDS HAVE KIDNEY TROUBLE AND NEVER SUSPECT IT.—Judging from reports from druggists who are constantly in direct touch with the public, there is one preparation that has been very successful in overcoming these conditions. APPLICANTS FOR INSURANCE OFTEN REJECTED.—An examining physician for one of the prominent Life Insurance Companies, in an interview of the subject, made the astonishing statement that one reason why so many applicants for insurance are rejected is because kidney trouble is so common to the American people, and the large majority of those whose applications are declined do not even suspect that they have the disease. A GREAT ECONOMY BECAUSE OF EXTRA WEAR.—After a trip to Kilauea, the active volcano of Hawaii, my Neolin-soled shoes were the only ones not absolutely ruined. Many in our party wore hob-nailed boots," said Miss Jean P. Lane of Seattle, Washington. The sharp jagged lava of Kilauea cuts an ordinary sole to pieces quickly. That Neolin Soles stood the test but emphasizes their toughness and durability. These qualities are built into them by a scientific process. Women—and men and children, too—who are hard on shoes should buy them with Neolin Soles. They come in many styles, and because of the extra wear they give, are a great economy. And any repairman will re-sole your worn shoes with Neolin Soles, which are flexible and waterproof as well as long-wearing. They are made by The Goodyear Tire & Rubber Co., Akron, Ohio, who also make Wingfoot Heels, guaranteed to outwear all other heels.

When a man gets to that point in his clothes-buying career that he realizes the best is the most economical—then it is that he demands Schleisner clothes.

When he considers perfect tailoring as the first step in clothes-satisfaction—then it is that he will have none other but Schleisner clothes.

When he becomes imbued with the idea that real fashion in men's clothing should carry with it dignity and refinement—then it is that he looks to Schleisner's for style.
