

ARMENIANS IN NEED OF FUNDS TO KEEP ALIVE

Dr. Worrell Gives First Contribution to Cause at Offices Just Opened

B. W. Desant, of New York, who is in Harrisburg assisting Chairman Charles W. Burnett in the preliminaries of the campaign, through which it is hoped to raise \$38,000 for Dauphin county for the benefit of suffering Armenians and Syrians, was asked to-day what is being done with the money that is being raised in the United States.

Mr. Desant said that besides the boats of supplies and workers which have been sent to the field, reports and stories constantly come home from those who have now been on the field since the beginning, casting bright and encouraging light on the effect which their devoted work is having on conditions in the North East, as well as the need for continued and increasing light on the starving orphan shall be left unattended and a man and woman deprived of the means of livelihood through no fault of their own.

The following story just received from John Elder, one of the workers of the Armenian Committee for Relief of the Near East in Erivan, emphasizes both these points in a particularly interesting way. He says: "The number of orphans has been raised from 150 to 250, and may soon be 450. This increase is due to a time during the fall I passed from two or three to eight or ten grimy, shivering, starving youngsters, crying by the roadside, for no earthly support, deserted by parents unable to care for them. There is no doubt that hundreds, probably thousands of them, died during the fall months of sheer starvation."

"The industrial work has been increased in every department. We have been putting out about 10,000 arshens of material a week, as compared to some 5,000 before and 100 new looms are practically ready to put to work. Our money work is done in making cloth which we sell at as low a price as possible, but which brings a very considerable sum of money, and again in providing cloth for the half-made refugee population of Armenia. We are at present working on a government contract for 5,000 soldiers' uniforms of black and white, and have about half finished. Our workers are approximately 6,000. Erivan 5,500, Ashtarak 6,000 and Etchmiadzin 1,400, in all about 7,500."

"In direct relief we are doing the following: our soup kitchen in Nova Bayazed gives food to about 900 regularly, and a much larger number occasionally. In Billion we have been giving milk and food to some 400, but will soon close that work as the refugees are leaving that region. In Erivan money distribution reaches 600 or more a month. In medical aid we reach about 3,000 a month through a company doctor, Dr. Mandinian whom many of you know, and through the hospital and outpatient department. During the cholera epidemic we had a special doctor giving full time to refugees in the streets and gardens."

The Rev. Dr. Edwin R. Worrell, of the Board of Temperance of the Presbyterian Church, today made a contribution to the local fund. Dr. Worrell appeared unsolicited before at the headquarters of the local committee in the Boy Scouts office, handed in his check to Mr. Heathcote.

Mexico Changes Its Attitude Toward Foreign Investments in Country

By Associated Press. Washington, April 4.—Recent private and official advices from Mexico City are interpreted as indicating a sudden change in sentiment in Mexico toward foreign investments in Mexico and that the coming session of Congress will clear the atmosphere of much of the hostility shown since the adoption of the 1917 constitution. The American States have not receded from the stand originally taken that their vested rights in Mexico should be recognized and that the anti-foreign and confiscatory features of the new constitution should not operate retroactively against them.
