

NEW DEVICE TO AID AIRPLANE IN BUSINESS USES

Will Tell Aviator of Weather Conditions and Point Out Landings

Washington, April 7.—Experts of the army signal corps, it is learned, have begun experiments with a recent invention, which they believe will prove valuable in making the airplane a commercial utility. Described as an "audible beacon," the new contrivance is designed as a signal which will advise the aviator not only of his own position regardless of weather conditions, but will serve as accurate marks for suitable landing places.

"The beacon" is said to be a combination of the new wireless telephone and the ordinary phonograph. Its operation will be more or less automatic and will repeat a word or signal designating its position. Recognition of the importance of armored tanks—ordnance cavalry in modern warfare is indicated by the peace-time organization of this arm, just approved by the war department.

"The United States will maintain a commission and ready for service, under these plans, a minimum of 1,059 tanks, 330 being of the heavy and 729 of the light type. A third type known as the "signal tank" is provided for company and battalion commander.

A tank brigade, composed of one battalion of heavy tanks and two of light tanks will be attached to each army corps.

War Is Blamed For Small Church Gain

New York, April 7.—The smallest gains in church membership in the present century were made in the year 1918, according to statistics collected by Dr. H. K. Carroll for the Christian Herald. Only 284,599 new communicants were gained by the churches. The war is given as the cause.

At the present time there are in the United States 41,565,908 members of churches, so that less than one-half the population of the country professes religion of any sort. Roman Catholics lead with 14,927,666 communicants; Methodists are second with 7,579,311, and the other churches having a membership of more than 1,000,000 are Baptists, 2,133,922; Lutherans, 2,443,812; Presbyterians, 2,259,358; Disciples of Christ, 1,611,160; and Protestant Episcopal, 1,072,312.

The small increase in the number of new members is attributed to the fact that many young pastors left their churches to go overseas as chaplains, Red Cross, Y. M. C. A., and Knights of Columbus workers, the closing of the church during the epidemic of influenza also was partly responsible. Decreases were noted in the ranks of the Methodist, Episcopal, Protestant Episcopal and Disciples of Christ.

DR. STEPHENSON SPEAKS
The Tabernacle Baptist congregation was addressed last night by Dr. E. M. Stephenson, director of the Young People's and Sunday school work for the Baptist churches in the State of Pennsylvania; Miss Evelyn Beard, director of the "teen-age work" and Miss Wilson, in charge of the elementary work.

DR. ROTHROCK TO BE HONORED

Arbor Day Will Have a Unique Meaning This Year

The first of the Arbor Days, recently officially designated by Governor William C. Sproul, will be observed in a most unusual manner by the State of Pennsylvania acting through its Department of Forestry.

The first Arbor Day comes on April 11 and April 9 is the eightieth birthday of Dr. J. T. Rothrock, of West Chester, the "father" of the forestry activities of the State. It is the plan of Commissioner of Forestry, Robert S. Conklin to observe the day and the birthday by planting eighty white oak trees in honor of Dr. Rothrock in a tract set aside in the historic Caledonia Furnace forest reserve in Franklin county.

Mr. Conklin in a statement issued today, says that the idea of planting memorial trees has an unusual significance this year and that many people will plant them in honor of men who fell in the war. "While we honor those who have done their highest duty in the great conflict, now rapidly ended, there is a feeling that we should honor some of those who still remain. To this end we have decided to plant the trees in honor of Dr. Rothrock," said he.

"Dr. Rothrock will be eighty on Wednesday and in honor of a lifetime of achievement largely devoted to altruistic pursuits wherein he cared more for the welfare of others than for himself, this planting is to be done. The members of the Forestry Commission will be in attendance and many of the foresters and the forestry attendants will be present."

Urged For Cross—Col. James G. Stees, son of James A. Steese, chief of the State Bureau of Mediation, has been named for the distinguished service cross because of his army service.

Governor at Springs—Governor Sproul and his son, Captain John R. Sproul, reached Hot Springs, Va., late Saturday. The governor will undergo a course of treatment for a week.

Senator's Daughter Weds—Miss Ada Marlow, daughter of Senator George Marlow, of York, was married in that city Saturday to Frank Owings.

Dr. Becht to Speak—Dr. J. George Becht secretary of the State Board of Education, is to speak at the dedication of the Lebanon High school.

"EXECUTES" FIRST HUSBAND
Uniontown, Pa., April 7.—Court officials and the judge himself were startled Saturday by the statement of Mrs. Mary Jones, a negro, that she had "executed" a former husband, having married a second time. "Where is your first husband?" asked Attorney George Patterson. "Oh, I done executed him and now Ise drawing alamaonia," was the reply. The jury acquitted another woman, whom Mrs. Jones had charged with assault and battery, and divided the costs of the case.

ASK WILSON TO SAVE HUNGARY FROM SOVIETS

Hungarian Federation Requests Permission to Send Food to the People

Cleveland, Ohio, April 7.—The Hungarian American Federation, a national organization of twelve years' standing and 40,000 members, with headquarters here, has cabled President Wilson at Paris, urging him to save Hungary from Bolshevism.

The cablegram, signed by Henry Barach, national president, and Eugene Pivany, national secretary, said that should official announcement be made that the right of self-determination of all people of Hungary will be respected and no territorial changes made without a plebiscite under American control, Hungarian people would regain hope, Bolshevism disappear and good government be restored.

Permission to send clothes and footwear to Hungary through Red Cross or other agencies, to help overthrow Bolshevism is requested.

Marine Workers to Vote on Settlement of N. Y. Strike Today

By Associated Press.
New York, April 7.—The question of whether the harbor strike in progress here for several weeks shall be called off will be settled today by a referendum vote of all members of the Marine Workers' Affiliation. This decision of strike leaders followed the action last week of three associated unions in effecting separate settlements with private boat owners.

If the men vote to return to work, the strike will be over to-night.

Union leaders decided upon a referendum, they said, after receiving a "peace proposition" from the boat owners. This proposition will be read at a mass meeting this morning at strike headquarters after which the vote will be polled. The private owners, it was said, have offered a 10 per cent. wage increase, but a 10-hour day instead of the eight-hour day obtained by the marine workers in reaching a settlement with the government.

'Always Reliable'

How Well You Remember

The days when you could buy a good suit of clothes for twenty-five dollars, thirty dollars was occasionally paid for clothes that were a bit out of the ordinary. Even today a good suit can be bought for \$35 and \$40 and seems like extravagance—And yet a clever clothing manufacturer put "fifty dollar" suits on the market which has made the whole country sit up and take notice.

\$50.00 Suits

One day he had an idea that started him thinking, you know the greatest discoveries and inventions are a flash upon the screen, but it takes time and labor to produce and put them into action. "Supposing" he thought to himself "that I made a suit that was better than any suit that had ever been made"—REMEMBER HE SAID BETTER—" would it sell for fifty dollars? I wonder." Then he asked his partner, who replied, "not on your life" not satisfied, he spoke to his salesmen who said "It can't be done."

I wonder if I'm wrong, he thought, I'll try it out; here's where the telephone came to the rescue, follow this closely it's interesting—He called up one of his friends and said, Ross, would you pay "fifty dollars" for the best suit of clothes you ever looked at? "You bet I will" said Ross—Then he called up Jim and Clarence and Howard, and in the thirty minutes he had sold ten suits. He delivered them and received twenty more orders. As a result of the original ten sales the fifty dollar suit business was started.

Last fall this clothing manufacturer marketed thousands and thousands of these good suits and this "Live Store" had the pleasure of distributing hundreds of them in this section of the country—They were the best suits that were ever sold in Harrisburg or anywhere else—so we placed a big order for these wonderful suits in every new spring model and they are certainly being carried away—"fifty dollar suits" why it's a cinch to sell the kind we are talking about because they're "better suits than anyone else can afford to make for more money."

Buy One of These For Your Easter Suit

Quality and service are the things that count--Rich and poor all like good quality, the best they can afford to buy, whether it's clothes or anything else—Give them the best and you'll get as much business as you can do. We are proving it every day in this ever busy store—Build up your quality and service, keep the price fair, that's the game.

A Self-Starting Career

Why not a career instead of merely a job?

It usually requires considerable capital merely to start a business—still more to carry it on until it becomes profitable.

Therefore, a business or profession in which one may make from the very outset a substantial income is well worth considering.

Life Insurance is such a business—a profession that can not only be entered without capital, but offers many other distinct advantages.

It is a healthful occupation, taking you out of doors and enabling you to get proper exercise.

It permits you to live at home. The most successful men and women in the profession have their clientele in the community in which they were born and raised.

It is a live career, ever growing in importance and usefulness.

It is a career less affected by financial unrest than any other line of business.

It is an independent career. You are your own master. Every ounce of effort you put into your work increases your rewards.

It is a career that is never over-crowded. There are no limits to its opportunities. Everybody needs one or more of the many forms of protection afforded only by life insurance. It is the practical solution of many commercial and industrial problems.

It is a career suggested and strongly recommended by the U. S. Government as a profitable occupation for discharged soldiers.

The Edward A. Woods Agency of the Equitable Life Assurance Society—the largest and strongest life insurance agency in the world—has room on its selling force for a few more good men and women.

This is your opportunity to enter a clean, essential, permanent occupation, a self-starting profitable career, if you are suited for it.

Our simple tests, similar to those used so successfully by the U. S. Army, will enable us to estimate your fitness, and if we feel your chances of success are not good, we will advise you frankly not to take up the work.
