"How can any man who believes in the principles of the Democratic party vote for such men?" asks Senator Balley. The answer is that he cannot. And it follows that such men will vote for the candidate who will do the most to draw the country away from the political heresics that have dominated its policies for the past six years and restore the principles of representative government that have given the United States the commanding position that she now holds among the world powers. That candidate will be the nominee of the Republicans, who will represent in his own person and in the party whose standard he bears, a record of &chievement, of strict adherence to the mandates of the Constitution and of constant of for to upbuild and protect American industries that will be an irresististic lodestone to those voters who still maintain a pride of country.

Politics in Pennsylvania

By the Ex-Committee

The first real adverse criticism of the legislative recess seems to have come, oddly enough, from a staunch people will recognize the brand and Republican newspaper. The Phila-delphia Record and Pittsburgh Post,

The Moving Picture Operators' Un-ion in Omaha, Neb., has established a six-hour day and raised wages from 50 cents to 70 cents an hour. Six years ago these workers, then un-ganized, were being paid from 20 to 25 cents an hour.

There is little opposition on the part of employers to the demand of horseshoers in Cincinnati for an eight-hour day.

"If I am. I've never discovered it." I assured him.

"Of course not. People never do anything like the full use of more than four fingers and two thumbs out of a total of ten. The normal man—be man who believes himself normal, I mean—never has. Can you light a safety match with one hand?"

"He handed me the box and the match.

Prudence Bardish, in her recently published book, "Mother Love In Action," is a firm believer that if mothers would exchange stories with their children and write them down for future reference, they would find themselves in possession of a most entertaining collection of literature. "One mother I know," she says, "had a charming little Christmas story that her son told her when he was only seven years old. She wrote it down. Now he is a leading magazine writer and one of his best-known stories is that Christmas story that he told his mother when he was seven years old." In "Mother Love In Action." a Harper book, the author has tried to solve the manifold problems constituting the mother's job and to encourage a deeper sense of the importance of the task that lies at the door of a mother who has the responsibility of little children on her shoulders.

Something New in Concrete

Certainly people would laugh at the suggestion of a concrete air-plane now, just as they would have laughed at the proposition to build a concrete ocean-going vessel fifty years ago.—From the Boston Tran-script.

Something seems to have affected the mulberry trees about Harrisburg and in the absence of a better cause, people familiar with these trees say that it is the weather. And the strangest part about it is that trees which survived last winter's severity have been the most affected. There are a number of so-caiswieweping; mulberry trees, a fancy creation, about Harrisburg and while several in private yards have been killed this year the mulberrys in Capitol park have been able to survive. The trees have been carefully inspected and no disease or inseesems to have ruined them, but the ar as dead as door nails. On the other hand, the State's mulberry treeright outside of the State Museum, is thriving and has just been pruned and fixed up for summer so that it can vie with the orange trees outside the windows of Dr. Thomas Lynch Montgomery, the State librarian. The cause for the deaths of the other trees is being looked up. The magnolia trees about the city, which are in bloom, are attracting much attention, but there are a number of such trees which show the effects of the cold spell some days ago. The mild winter has caused the magolias to bloom earlier than usual in many cases and the flowers are not as delicately shaded in many cases as formerly, while the outside leaves are dark brown.

The Senate of Pennsylvania has been officially asked by American

The Senate of Pennsylvania has been officially asked by American soldiers in English camps to interest itself in the return of soldiers who are married. Several letters have been received by senators and officers asking that some action be taken. The letters are mostly from men who claim that they are married and that their families are suffering inconvenience as a result of ried and that their families are suf-fering inconvenience as a result of their retention in the service. One man wrote that his pay is only \$52 per month and that his family ex-penses run about \$85. Another who addressed "The senators of Penn-sylvania" said frankly that "I want to get home just as soon as I can." Another asked that the newspapers of the State be interested.
