

SUPPLY CLOTHES TO THE BALKANS

Red Cross Is Furnishing the
Cloth and the Sewing
Machines

Saloniki, April 11.—To meet the great need of clothing throughout the Balkan States, the American Red Cross Commission to the Balkans is sending to Serbia, Rumania, Montenegro and Albania millions of yards of cloth, thousands of sewing machines, large quantities of thread, needles and buttons and hundreds of tons of old clothing. These things will be apportioned among the countries according to the extent of destitution. The commission is also shipping large amounts of food to various points in the Balkans which have suffered from the German occupation.

"If any of the Balkans goes unclad or unfed," said Lieutenant-Colonel Henry W. Anderson, director of Red Cross activities in the near East, "it will be only because we lack the transportation facilities to reach the remotest interior sections. We have gathered up millions of pieces of clothing and thousands of tons of food from every nook and corner of Europe and will rush them to those sections of the Balkan States which are most in need."

"We have taken over the surplus stocks of relief supplies held by the American Red Cross Commission to Italy. We have also had diverted to our use, for distribution in the Balkan Peninsula, large quantities of material intended for use in France and other countries during the war. One of the principal items is condensed milk, of which we are shipping more than three million cans. This doubtless will save thousands of starving children."

A Man's

Easter

Suit

—is just as important as his "better half's" Easter apparel, and should be correct in every way.

—Most men like the informal or "every-day" mode of dress. That's very much American; but the frock coat is a much liked mode among men who live up to the fashion dictum.

—This does not mean a man must wear a frock coat to be well dressed.

—A Schleisner spring suit in the new snug-fitting models will distinguish a man.
