DANDRUFF GOES! HAIR GETS THICK, WAVY, BEAUTIFUL

Save your hair! Double its beauty in a few moments. Try this!

Hair stops coming out and every particle of dandruff disappears.

Try as you will, after an application of Danderine, you can not find a single trace of dandruff or falling hair and your scalp will not itch, but what will please you most, will be after a few weeks' use, when you see new hair, fine and downy at first—yes—but really new hair—growing all over the scalp.

A little Danderine immediately doubles the beauty of your hair. No difference how dull, faded, brittle and scraggy, just moisten a cloth with Danderine and carefully draw it through your hair, taking one small strand at a time. The effect is immediate and amazing—your hair will be light, fluffy and wavy, and have an appearance of abundance; an incomparable lustre, softness and luxuriance, the beauty and shimmer of true hair health.

Get a small bottle of Knowlton's Danderine from any drug store or toilet counter for a few cents, and prove that your hair is as pretty and soft as any—that it has been neglected or injured by careless treatment—that's all.

Danderine is to the hair what fresh showers of rain and sunshine are to vegetation. It goes right to the roots, invigorates and strengthens them. Its exhilarating, stimulating and life-producing properties cause the hair to grow long, strong and beautiful.

Will Discontinue Work Train After April 15

The work train of the local plant of the Bethlehem Steel Company, known as the "Cannon Ball," which for a number of years has been bringing the men back and forth from the Locust street entrance of the yards to the bridge shop in the East End of the plant, will be discontinued after April 15, according to recent announcement.

The discontinuance comes partly as the result of the failure on the part of the passengers to heed warnings and the tendency to disregard all rules of safety. It is said to be almost the regular thing for men to board and leave the train while in motion, and to ride the platforms instead of entering the cars.
