

DEMOCRACY FOR RUSSIA URGED

Admiral Kolchak Declares It Only Admissible Form of Government

Omsk, Siberia, April 23.—Admiral Kolchak, head of the All-Russian Government, speaking recently in Ekaterinburg before a conference of members of the Duma, zemstvo and other organizations, reiterated his belief in democracy for Russia, declaring it to be "the only admissible form of future government."

Bolshevism, he said, is destroying the very foundation of authority in the country and means a desperate struggle for a long time.

At present, he pointed out, conditions sometimes force the government to employ means which do not correspond with principles of democracy, but he assured his hearers that such measures were temporary and that steps were being taken to insure universal suffrage, labor and land legislation and to develop organs of self-government.

"The government endeavors to maintain and strengthen friendly relations with the Allies," said the dictator. "Russia was alarmed by the invitation to send her delegates to Prince's Islands to negotiate with Bolsheviki. Now this question is settled. The statesmen of western Europe now see the truth and blame the Bolsheviki, calling them murderers and terrorists, as did Lloyd George."

"The government is inspired with the idea of restoring the motherland. It is not called upon to settle all fundamental questions. The Russian people is master of its fate. Released from the yoke of Bolshevism it will, through its representatives in a national assembly, express its will in regard to its form of government and its social structure. Then the present government will transfer its power to such an authorized government."

What Women in Their "Forties" Need

BY A SPECIALIST

Many women approach the critical coming period of their lives that comes between the ages of forty and fifty, unprepared for its tremendous importance to their future health and happiness. Not understanding the functional changes taking place in their bodies, they work beyond their strength, often break down, become nervous wrecks, their bodies suffering with fatigue and their weakened nerves trembling at every step. Often in their weakened condition capillary hemorrhage begins to take place, this added drain compelling them to take to their beds from nervous exhaustion.

What these women need is something that will instantly relieve the pressure on the overworked nerve centers and give them the vitality to stand up under the gruelling strain. Wonderfully effective results are often given in such conditions by the use of Margo Nerve Tablets, a skillful combination of six of the best nerve vitalizing elements known to modern chemistry. These little tablets contain no dangerous habit-forming drugs and are entirely harmless in use.

Thousands of women can testify that Margo Nerve Tablets strengthen the jaded nerves, revive the tired brain and put the energy and courage into the body that enables one to stand up under the unusual strain of the changing period. Margo has to do these things or it costs nothing as Kennedy's, G. A. Gorgas and other leading druggists sell it on a positive guarantee of relief or money back.

IF YOUR EARS RING WITH HEAD NOISES

If you have roaring, buzzing noises in your ears, are getting hard of hearing and fear Catarrhal Deafness, go to your druggist and get 1 ounce of Margo Nerve Tablets (strength), and add to it 1/4 pint of hot water and a little granulated sugar. Take 1 tablespoonful four times a day.

This will often bring quick relief from the distressing head noises. Clogged nostrils should open, breathing become easy and the mucous stop dripping into the throat. It is easy to prepare, costs little and is pleasant to take. Anyone who has Catarrhal trouble of the ears, is hard of hearing or has head noises should give this prescription a trial.

Moyer Says 'twas Neighbor Told Her

A. M. Moyer, 312 North Horton street, Philadelphia, speaking for his wife, says that it was through a neighbor that she heard about Tanlac. "She suffered from stomach trouble and belching of gas and had considerable pain and distress. Her appetite was very uncertain and she had a nervous internal condition. She has taken several bottles of Tanlac and found relief from almost the first dose. The gas has stopped forming and all the disagreeable symptoms have disappeared. Her appetite has become normal and she hardly knows what nerves are now. Tanlac has proved a great thing for her."
