

Point Scale System to Determine Outside Interests of Students

Pittsburgh, April 24.—The first real effort to determine the extent to which a college student may indulge in interest outside the course of study is the adoption of the Point Scale System, which is now being inaugurated in several leading American universities. The University of Pittsburgh is among the first to adopt this method of regulating the student's participation in athletics, fraternity life and the various so-called student activities.

By the plan recently accepted at

Cause of Sore Feet Science proves that the cause of tender, burning and excessive perspiring feet is from congestion in the subdermal blood vessels. If this condition is allowed to continue, it may become serious. Immediate and lasting relief can now be obtained by the simple but scientific treatment known to every foot doctor and druggist as the Cal-o-side foot bath. It acts through the pores and corrects the cause. Cal-o-side costs but a quarter. Each package contains little plasters that will remove the most stubborn corns. You can have good feet.—Adv.

Panama Hats Ladies' and Gentlemen's Cleaned, Shaped and made to Look Like New At a Very Small Cost Bring in your old Panama and you'll have it ready when you want to wear it. We are practical mechanics and guarantee our work.

LEGISLATURE NEWS

NEW ALCOHOL BILL IN HOUSE ANTI-DOPE BILL FAR REACHING

Much Attention Attracted by the McCaig Bill Just Presented Measure to Systematize the Traffic Is Ready For Hearing

The bill presented yesterday by Mr. Ramsey, Delaware, to legalize the sale of liquor containing less than two and three-quarter per cent. of alcohol, is dividing interest with the bill presented by Mr. McCaig, Chairman of the House Appropriations Committee, making it lawful for any person, firm or corporation formed for the purpose "to engage in the manufacture or distillation and sale of ethyl alcohol and preparations thereof for medicinal, scientific, commercial or other lawful purposes, provided a license is obtained. Ethyl alcohol is the kind used in intoxicating beverages and is generally known as 95 per cent. alcohol.

The firm or corporation desiring to take advantage of the McCaig bill would file a petition in the office of the Secretary of the Commonwealth setting forth: The name of the applicant, and if a partnership, the names of all the members thereof; the location of the factory or distillery; the production capacity of the factory or distillery, and the location of the principal office of the applicant. If the Secretary of the Commonwealth found the application in proper form, he would issue a license good for one year which would cost \$500. The license could be renewed annually at the same rate. The bill provides that a license would not be required to obtain a license under any law regulating the manufacture and sale of intoxicating liquors.

Representative Theodore Campbell, of Philadelphia, has presented a bill making it unlawful for a person or corporation to sell or attempt to sell any food, drug, preparation or mixture intended for internal use which contains methyl or wood alcohol. The proposed law would not apply to the external use of such preparations on animals. The penalty for violation would be a fine of \$500.

University of Pittsburgh Graduates Plan Meetings

Pittsburgh, April 24.—Dr. James Finley, New York State superintendent of schools, will be one of the principal speakers at the annual banquet of the New York Pitt Club on May 3. Dr. Finley's great grandfather was one of the founders of the University of Pittsburgh, in 1787. Another guest at this banquet will be Irvin Cobb, the noted humorist. May 10, Johnstown, May 8, and the Monongahela Valley graduates will assemble at Monessen on May 9. Many of these organizations are holding their first sessions since America entered the World War.

When it is realized that the drug bill of the American people is \$500,000,000 a year, and that there are about 125,000 active physicians in the Union, it appears that there are about four thousand dollars' worth of drugs used per physician. Anyone knows that the greater proportion of this immense drug supply does not reach the public through professional channels and that some of the quantity of the drugs used is unnecessary.

The Department of Health does not aim at the whole drug situation, nor is it trying to suppress the so-called patent medicine, or domestic medicine. The Department is exclusively to control habit inducing drugs and those that may under certain conditions be dangerously depressing, the whole object being to see that the people are not using these narcotic and depressing drugs supplied when necessary; but, when unnecessary, they are harmful and should be controlled by law as far as possible.

New Liquor Bill Appears in House

A bill legalizing the manufacture, sale and shipment of liquor containing less than 2 3/4 per cent. of alcohol, was presented in the House at the late afternoon session yesterday by Mr. Ramsey, Delaware. It designates such liquors as non-intoxicating.

The proposed act is to be effective from January 16, 1920, and the penalty for violation is made fine of not over \$5,000 or one year in jail or both.

It is stipulated that all liquor laws now in force shall be effective, only the alcoholic content to be different. The Vickersman mother's pension bill providing a new method of administration was passed at the afternoon session of the House. The physical education bill was postponed.

After passing the bill authorizing boroughs to sell lands to school districts, the House adjourned at 3:50 p. m., until 7 p. m., Monday out of respect to the memory of the late ex-Representative James M. Rohl, of Allegheny.

Salvaging Y. M. C. A. Motor Trucks Hard Task

As Uncle Sam's biggest job came after the war, to make a permanent peace and help keep the Bolsheviks down, so, according to James H. Littlefield, of Lanerch, the returned Y. M. C. A. man in charge of the motor transport corps doing salvage work, the biggest part of this branch of the Y. M. C. A. work started after the armistice.

supplies, were scattered over the whole battlefield from Chateau-Thierry to Belfort, more than 250 miles of territory. The transports would convey the chocolate, cigarettes and other Y. M. C. A. supplies up to a mile from the fighting line, and then the Y. M. C. A. secretaries would take a bag or knapsack full of the stuff on their backs to the doughboys in the firing line, often under fire.

"We had five districts along the battlefield, in each of which the Y. M. C. A. had a repair shop and mechanics' busted all the time keeping our transports in running order. But anywhere in the battle regions where we could put up a shed to keep the rain off, became our temporary repair shop.

"My biggest job, like Uncle Sam's, came after the war was over. When the armistice was signed I traveled over the whole battlefield and assembled the motor cars that had done such valiant service and which needed repairing. We loaded more than 100 carloads full of them and sent these salvaged cars onto Paris, which was the central point for our motor transport corps."

SOUTTER'S 25 CENT DEPARTMENT STORE

Buy Here Not Alone Because Prices Are Lower, But Because Qualities Are Better

Tomorrow's Big Special Sale Includes Our Entire Stock Forming Many Attractive Values In Seasonable Merchandise

There's a host of attractive values that demonstrate the many money-saving advantages of this big store. The opportunity of securing quality merchandise at lower than elsewhere prices has never been better demonstrated than at this time as you will note in reading the many items listed below. Come early in order to secure a selection from a complete stock for we anticipate large crowds during the entire day.
