

T. Ellsworth Davies, Who Made Coal Land Survey For Dauphin County, Dies

T. Ellsworth Davies, of Scranton, the mining engineer employed by the county commissioners to determine the value of coal lands in Dauphin county, died suddenly yesterday afternoon at his home in that city, after a illness extending over the last few days.

During the last several weeks Mr. Davies had been present at the sessions of the county commissioners and the coal company representatives, and he was represented by his assistant, W. F. Sekol. It is understood Mr. Sekol will be retained to continue the work until a final assessment is fixed on the coal company properties.

To-morrow he will go to the Susquehanna Collieries Company mines for an investigation at which time the coal company engineers and Mr. Sekol will endeavor to agree on the tonnage of unmined coal. A report will be made to the commissioners when the next appeal session is held May 26.

Mr. Davies is well known in the anthracite regions as he conducted investigations during the last few years in Lackawanna and Luzerne counties. As a result of his work and the reports made by him valuations of coal properties in these districts were increased, and when the companies appealed to the courts, the county officials and Mr. Davies were

Shortage of Labor Forecast by State

Predictions are made by Jacob Lightner, superintendent of the employment bureau of the Department of Labor and Industry, that there will be a big industrial and business boom this summer and a shortage of labor by July 1.

Granting of appropriations to the railroads by Congress will permit the companies to start much needed improvements which have been held up, Mr. Lightner said. To complete these equipment will be needed which will be needed which will help along the steel industry.

The employment bureau during the month of April placed 10,113 of 10,566 applicants, of whom 2,062 were women. Positions were found for 2,740 soldiers of 2,932 applying; while 5,164 of 5,464 civilians were given work. At present there is a shortage of first-class machinists, carpenters, vulcanizers and double-entry book-keepers.

FAMO Makes Women's Hair Grow Luxuriantly

Beautiful, healthy, lustrous new hair comes to the head on which FAMO is used regularly. Women have reported to us that their hair grows as much as four to six inches a short time after they began using FAMO. It also grows men's hair, even where baldness is beginning to appear. Unless the hair roots are absolutely dead, FAMO will grow hair. FAMO grows new hair because it destroys the seborrhea germ which is killing the hair. The seborrhea bacilli go down into the glands and attack the hair roots. Unless they are destroyed they will eventually kill the hair. With the germ at work the hair is fighting for its life. Nature fights against disease. But it cannot conquer—alone. FAMO will give the necessary aid to assure a healthy scalp. FAMO will destroy the dandruff bacilli and make the hair grow luxuriantly.

It stops all itching of the scalp. FAMO is the result of three years of scientific experimentation in one of the greatest pharmaceutical laboratories of Detroit. Its ingredients have been well known to physicians for years but have never before been used on the head. FAMO has accomplished wonderful results. Every member of the family should use it regularly. It contains no alcohol. FAMO is sold at all toilet goods counters and applications may be had at the better barber shops and hair dressing establishments. It comes in two sizes—a small size at 35 cents and an extra large bottle at \$1. Your money will be refunded if you are not satisfied.

Seborrhea is the medical name for a scaly, increased flow from the sebaceous glands of the scalp. The seborrhea secretion forms in scales or flakes and is commonly known as dandruff.
