

U.S. AUTOCRACY ENEMY TO U.S. INDUSTRY

Professor Declares Democracy Must Rule in Business

Chicago, May 9.—America's national weakness as revealed by the war "is discovered by the insecure and bad industrial system," said Earl Dean Howard, professor of economics at the University of Chicago, in an address to-day before the Federal Council of the United States. "The industrial autocracy, whether in the form of domination by corporations or by the Federal Council, is our enemy at home and abroad," he declared. "The German autocracy was our enemy there," he continued. "The idea of democracy as a means of adjusting human relations, both politically and industrially, has taken deep root in the world, and this country may not hope to escape the logical consequences of the development of their tendency. The masses of people who depend upon industry for their entire livelihood are losing confidence in the system of free enterprise which is still largely autocratic in its methods. "Unless the government and business management unite to restore general confidence in our industrial system, it is inevitable that social forces which are already in existence will find our country as unprompted to meet the supreme test as we were to face the war with Germany, and with much less hope of a satisfactory outcome. All of the constructive forces whether on the side of management or organized labor must join to satisfactorily adapt our industrial relations to the needs of the post-war conditions so as to deprive the racial and destructive forces of their power. "If employers, by collective action or otherwise, are unwilling to assume responsibility for meeting the human needs of workers within industrial management itself, then assuredly responsibility will be assumed by organized labor or by the government, or at the very worst, by the proletariat in a Bolshevik form of government. "The idea of democracy in industry is even now becoming the foremost topic in economic discussion. It may be translated 'righteousness in business relations.'"

Removes Hairy Growths Without Pain or Bother

(Modes of Today) It is not necessary to use a painless method to remove hairy growths, but a little delatone handy you keep the skin entirely free from beauty destroyers. To remove make a stiff paste with a little delatone and water. Spread in the hairy surface and in 2 minutes rub off, wash the hair and the hairs are gone. To get real delatone, be sure to get real delatone.

WILL REORGANIZE SCHOOL SYSTEM

Governor Arranges For Discussion of Important Plans

General educational conditions in the State were discussed for an hour with Governor William C. Sproul late yesterday by a committee of some of the prominent educators of the State, the meeting having been arranged for an interchange of views. The whole situation was gone over at length and numerous suggestions were made by the educators for improvement of conditions. As a result of the meeting it is probable the legislative committee to investigate the school system will confer with educators and probably adopt as a report a bill on which the combined thought will be centered. This bill will reorganize the Department of Public Instruction. During the conference with the educators a committee of the Philadelphia Real Estate Board, of which William H. Ball, secretary to Dr. Martin G. Brumbaugh, when Governor, is executive secretary, waited in the reception room. The appointment for this board was for after 2 o'clock to discuss the profiteering charges against real estate owners and owing to the time taken by the educators, Mr. Ball and his party decided not to wait and took a train soon after 3 o'clock. The fact that the former secretary, who had kept many an important man waiting in his suite, could not wait was much commented upon. The educators committee consisted of Dr. F. E. Downes, president of the State Educational Association; Miss Margaret Maguire, Philadelphia; Dr. J. Eisenberg, president of Slippery Rock Normal School, and Dr. Charles S. Davis, Steelton, former president of the State Association. Dr. Samuel Hamilton, Pittsburgh, and Dr. J. W. Snoko, Lebanon, were unable to be here. Governor Sproul discussed the Philadelphia bridge with John T. Windrim, the Philadelphia architect, and saw a number of prominent men and conferred with legislators about pending bills. He also recalled that that railroad bridges would be expected from his provisions and that he would sign the bill.

University of Liege Honors Belgian Queen

Brussels, May 9.—Queen Elizabeth of Belgium has been nominated Doctor of Medicine by the University of Liege, in recognition of her work as nurse throughout the war. The rector of the university handed the diploma to the Queen and read an address from the faculty in her honor.

Willys-Overland Plant Closes After Clash of Strikers

Toledo, Ohio, May 9.—The plant of the Willys-Overland Company was closed late yesterday afternoon by Clarence A. Earl, vice president of the company, following a clash between strikers and police in which bricks, stones and clubs were used as weapons. The trouble resulted when several hundred strikers attempted to talk with employees who had refused to join their ranks.

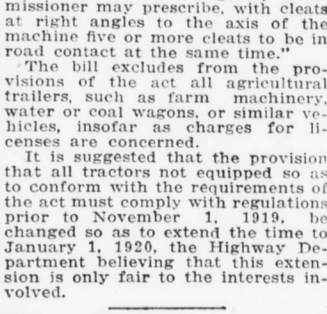

CHANGES FOR TRACTOR BILL

Highway Department Would Except Agricultural Machines

The State Highway Department has recommended certain changes in Senate Bill No. 796, which amends the traction engine law of June 8, 1915. These changes correct objections to the measure raised by agricultural interests at a hearing held by the House roads committee Tuesday. "The Highway Department suggests that agricultural implements be excepted in the clause which provides that 'no traction engine, trailer or other vehicle shall be moved over any highway or bridge in excess of 14 tons * * * vehicle and load combined, nor shall any such engine, vehicle or contrivance * * * be moved * * * which has any flange, revolving belts or chains, ribs, clamps and cleats.'" The changes suggested by the Highway Department would except from the provisions of this clause all "agricultural implements, such as grass mowers, binders, manure spreaders, hay loaders, rakes, grain drills, potato planters, etc." Another change would permit the operation of caterpillar tractors, an added provision declaring that "the caterpillar or crawler type of tractors may operate with such modifications as the State Highway Commissioner may prescribe, with cleats at right angles to the axis of the machine five or more cleats to be in road contact at the same time."

LIFT OFF CORNS!

Drop Freezezone on a touchy corn, then lift that corn off with fingers

Doesn't hurt a bit! Drop a little Freezezone on an aching corn, instantly that corn stops hurting, then you lift it right out. Yes, magic! No humbug! A tiny bottle of Freezezone costs but a few cents at any drug store, but is sufficient to remove every hard corn, soft corn, or corn between the toes, and the callouses, without soreness or irritation. Freezezone is the sensational discovery of a Cincinnati genius. It is wonderful.

MAKE FORTUNES IN FISH TRADE

Skippers Operating Out of Hull Are Doing Big Business

Hull, England, May 9.—Fortunes from fish are being piled up by skippers operating out of Hull. All through the war their profits were so tremendous that they now constitute a kind of local plutocracy. They have town houses and country houses and garages filled with motor cars. There are about ninety skippers working their vessels out of this port. The majority are rough sailors, with a rule-of-thumb knowledge of navigation, and curious ideas about the best way to spend their huge earnings. For several years many of them have been netting from \$40,000 to \$50,000 annually. One is said to have averaged close on to \$60,000. A record is held by the skipper of a trawler which last fall made the Iceland voyage twice within six weeks, returning from the first trip with a little less than \$100,000 worth of fish, and from the second with a little more than that amount. The skipper's net profits from the two trips was something like \$20,000. The second voyage lasted only seventeen days. Owners of the fishing craft, who take none of the risks the skippers face, make even more money. A boat which hardly would have been thought worth sending to sea before the war can be counted on now to bring in net profits at the rate of more than \$100,000 a year. Wild speculations are going on in trawlers, the boats changing hands at ridiculous prices. It is a gamble against time, for when the trawlers now engaged in mine-sweeping are released from that work the fishing fleet here will be tripled and fish profits will drop accordingly.

Fifteen Persons Meet Death in Texas Tornado

Corpus Christi, Tex., May 9.—Fifteen persons were killed Wednesday night when one of the worst tornadoes experienced in southwest Texas swept the lower Rio Grande Valley, demolishing farm houses and doing great damage to growing crops, according to telegrams received here from the storm area.

with a little less than \$100,000 worth of fish, and from the second with a little more than that amount. The skipper's net profits from the two trips was something like \$20,000. "Harrisburg's Dependable Store"

THE returning soldiers tell us they don't understand why Wm. Strouse prices are only \$25—\$30—\$35 for suits of the SAME QUALITY that other stores are selling at much higher prices.

We can only give them the same explanation that we gave the citizens of Harrisburg in one of our last week's advertisements.

That some merchants stocked too heavily with clothing at "beginning of season prices" and cannot afford to go into the market weekly to buy at present lower prices—and that Wm. Strouse did not do this—for he managed his business so that the public can buy the most excellently tailored, silk sleeve lined, quarter trimmed, waist seam suits at the low prices of

\$25 - \$30 - \$35

Stratford Clothes—America's Finest Young Men's Line Is Sold Exclusively By Wm. Strouse & Co.

Straws! Straws! Straws!

It's time for 'em—and Wm. Strouse

prices and styles are right too!
